Subject: Do not accept delays on targets for PSE climate goals
Date: Wednesday, February 24, 2021 2:17:39 PM

External Email

Dear UTC Commissioners,

I am writing to you about PSE IRP, Dockets UE-2003044 and UG-200305

Puget Sound Energy's draft 2021 Integrated Resource Plan is unacceptable because it fails meet targets set by 2019's Clean Energy Transformation Act (CETA) requiring utilities to be 80 percent carbon free by 2030. Climate tipping points will not listen to excuses by PSE --they must step up.

PSE must fast track renewable energy and storage infrastructure, retire the Colstrip coal plant before 2025, and cancel the Tacoma LNG and any other planned fossil gas plants, expansions or pipelines.

Other utilities in WA are able to do this, and Puget Sound Energy must also comply with climate goals. Do not allow them to exploit the cost cap loophole in the Energy Transformation Act. We can and must do better.

Thank you.

Sincerely,
Ruchi Stair
