Dear UTC Commissioners,

I feel empathy for the next generation after listening and reading the science outlining what is in store for our planet.

We are the last generation that can save our planet.

In the first 12 chapters of Matthew in the Bible, there is one verse showing Jesus praying and 25 verses where Jesus is doing something to reduce human suffering. He is our model. Our actions can avert monumental suffering going forward from climate catastrophe.

Please get off coal and stop building new fracked gas facilities like the Tacoma LNG.

Sincerely,
Sandy Spears
WA
