---

t o whom it may concern

I will not consent having a smart meter installed on my property due to the many documented health risks that can occur,

I do not consent to the "opt out" option as is not easily understood as to why the public should "opt out" of a contract that was never established with Avista. The public has also not been informed about the opt out clause in a fair manner.

Smart meters are simply a ploy for the investors and stakeholders to reap the benefits and only will cause health and monetary detriments to the public.
