Subject: Puget Sound Energy Redmond Construction Project

We have received your letter of May 23, 2003 concerning the limited time available to comment on Puget Sound Energy's Redmond Construction Project. We apologize for this inconvenience and as a result of your concern we will require a longer comment period for future construction projects that must comply with 480-93-020 WAC Proximity Considerations or 480-93-030 WAC Proscribed Areas.

We will notify representatives from Puget Sound Energy to inform them of your interest in this project. They will be required to notify the Commission prior to the start of the Redmond project. This will allow the Commission to keep abreast of project status and allows the Commission to perform periodic unannounced inspections.

We appreciate your feedback concerning this important issue. Thank you for your interest in pipeline safety.

Feel free to contact me directly at (360) 664-1322 if you have any questions or comments concerning this or other pipeline safety projects.

Sincerely,

Joe Subsits
Pipeline Safety Engineer

cc. Kaaren Daugherty, Puget Sound Energy
