Bob,

The City would like to request an extension on the time to use these grant monies to construct a fence around the BNSF property in the vicinity of the Naches River Bridge. The need for this extension is due to a misunderstanding of what the project was to accomplish. Because of this, the agreement was never signed. The City would appreciate extending the deadline to June 30, 2009. Attached is the updated application that more clearly describes the work to be accomplished with this grant. Do you want to update the agreement or should we just sign the original agreement. Please advise on what you would like us to do. Thanks for your help.

Bob,

I updated the application and drawing for the grade crossing protective fund. Let me know if this is acceptable. If so, I will have our City Manager sign the agreement. We will have until when to spend the money?
