At this time, Staff will continue using the 1998 FCC Part 32 because it contains the required level of detail that fills our needs. Updated versions of Part 32 do not include some accounts and has combined other accounts. Also, the FCC has opened a rulemaking regarding accounting rules. Staff would prefer to maintain the current accounting requirements until the FCC's accounting rule changes are solidified, and until the potential effect of changes to intercarrier compensation on accounting needs can be determined, before making changes to the UTC's accounting rules. If the FCC decides to change the accounting rules in a significant way, then the UTC would be able to carefully analyze how its needs can be met through maintaining the federally-required uniform system of accounts, whatever it might turn out to be, and then can decide what additional accounting requirements it may have.
