Subj: Request for 1000 DID numbers
To:

As requested we submit the following information associated with our request for 1000 DID numbers.

We are a worldwide company and need a specific range of numbers to work with our current telephone system. Without this our current telephone system will not function properly.

Currently we have about locations. We are moving to and the current numbers we have are not portable to our new location.

This accounting of numbers does not include our main phone number, which we do NOT want to change. The new numbers will need to be in place for testing in April, and will need to "go live" by March.

We currently have extensions in use between our various locations.

The 1000 DID's will be activated and used in March of 2013. We are moving and our current numbers for will be returned to the provider for reuse after appropriate aging.

Denial of the numbering request will not allow our phone system to work so we will not be able to communicate properly with our other locations.

2

As Stated above, we are requesting all new lines for our national and international sites we will need the consecutive numbers are requested.

Because of our within the following range.

this is our first and best choice for our needs

Can work with:

Thank you.
