**RE: UG-151776, NW Natural's 2016 IRP Revised Work Plan  
DO NOT REDOCKET**

On August 28, 2015, NW Natural filed its 2016 IRP Work Plan with WUTC Staff in compliance with Washington Administrative Code ("WAC") 480-90-238, which states,

*(4) The work plan must outline the content of the integrated resource plan to be developed by the utility and the method for assessing potential resources.*

and

*(5) The work plan must outline the timing and extent of the public participation.*

The Company now files a revised IRP Work Plan after determining that the 2015 Technical Working Group meeting agendas could be consolidated into 2016 Technical Working Group meeting agendas. The revised schedule will allow for more substantial meetings and more efficient use of stakeholder time. The remainder of the Work Plan is unchanged.

If you have any questions regarding this plan, please contact me at 1-503-226-4211, extension 5865.

Sincerely,

*/s/ Gail Hammer*
