RE: Request for Certification of Apprentice Labor Standard on the Palouse Wind Project

Dear Rick Zimmerman:

Thank you for submitting a request for certification of the apprentice labor standard on your project to the Washington State Apprenticeship and Training Council (WSATC). Department staff completed a review and we received confirmation that you indeed provided sufficient evidence to verify the claim of greater than 15 percent Washington approved apprentice labor hours utilized on the Palouse Wind Project.

The Council voted unanimously on October 17, 2013 to approve the apprentice labor standard certification request for this project. Please accept this letter as confirmation that RMT Energy achieved greater than 15 percent of the total labor hours performed by registered apprentices in programs approved by the WSATC on the Palouse Wind Project. Thank you for supporting the use of registered apprentices in the renewable energy field.

Sincerely,

Ed Kommers, Chair
Washington State Apprenticeship and Training Council
