Dear Washington Utilities and Transportation Commission,

I know too many people who are barely hanging on economically, and with the deaths we just witnessed in Texas due to power failures in the cold snap, I am reminded how easy it is to huddle under the blankets, fall asleep, and freeze to death. Please don't let Washingtonians suffer or die because they can't afford essential utilities which are so ubiquitous here that it probably costs more to monitor accounts and serve notice and ultimately perform the disconnect than it does to just keep the lights and heat on for

I am writing to ask the Utilities and Transportation Commission extend the moratorium on utility shut offs until at least September.

It is now clear: the moratorium saves lives. A recent study by the National Bureau of Economic Research showed that the coronavirus infection rates last year were 4.4% lower in communities that banned electricity and water service disconnections during the pandemic, while death rates from the disease were 7.4% lower.

Almost a year into the COVID crisis, it is clearer than ever that the effects of the pandemic are not going away anytime soon. We need to act on people's needs instead of those of profitable utility companies. Right now, up to 2.2 million people in Washington ? almost one-third of the state ? could be struggling to pay for food, according to recent reports. You have the power to ensure that we don't compound their suffering by turning off their electricity, too.

Washington can be a state where everyone -- no matter their race, income, or where they live -- has access to electricity. This is a state where people's health and well being, not corporate profits, can drive policymakers' decisions. Utilities are more essential than ever to keep our communities healthy and safe. Together, we must make sure that Washingtonians can count on essential utilities throughout the pandemic and beyond.

Please, keep the lights on.

Sincerely,

Jamison Green
