

ICNU Data Request 26.94

Please refer to GND-5T, page 49, lines 22-page 50, line 1. Does Mr. Duvall acknowledge that the Company has made this same type of adjustment (28 day cap) on a routine basis as part of its Transition Adjustment Mechanism (“TAM”, or “NPC update”) filings for several years now in Oregon?

Response to ICNU Data Request 26.94

No, the Company has not made this same type of adjustment on a routine basis. Pursuant to the Oregon Public Utility Commission’s Order No. 07-446 in Docket UE 191, the Company capped the outage specifically identified by the Oregon Commission at 28 days in subsequent Oregon regulatory filings. In the most recent TAM (UE 216), no units were capped at 28 days because the outage identified in Order No. 07-446 was no longer in the 48-month historic period used to determine the outage rates.
