Dear Washington Utilities and Transportation Commission,

We are all hit hard by the impact of COVID. So many of my friends and family are currently struggling with joblessness, trying to persevere through this trying time. But we have not overcome it yet, and we need support to get us back on track. We will resume a new normal eventually. Right now, however, preventing utility shut off is a necessary measure to ensure public health and safety. Please, work together with us to safely overcome COVID's detrimental effects. Thank you!

I am writing to ask the Utilities and Transportation Commission extend the moratorium on utility shut offs until at least September.

It is now clear: the moratorium saves lives. A recent study by the National Bureau of Economic Research showed that the coronavirus infection rates last year were 4.4% lower in communities that banned electricity and water service disconnections during the pandemic, while death rates from the disease were 7.4% lower.

Almost a year into the COVID crisis, it is clearer than ever that the effects of the pandemic are not going away anytime soon. We need to act on people's needs instead of those of profitable utility companies. Right now, up to 2.2 million people in Washington ? almost one-third of the state ? could be struggling to pay for food, according to recent reports. You have the power to ensure that we don't compound their suffering by turning off their electricity, too.

Washington can be a state where everyone -- no matter their race, income, or where they live -- has access to electricity. This is a state where people's health and well being, not corporate profits, can drive policymakers' decisions. Utilities are more essential than ever to keep our communities healthy and safe. Together, we must make sure that Washingtonians can count on essential utilities throughout the pandemic and beyond.

Please, keep the lights on.

Sincerely,

Stephanie Reyespalmou
