3
4 **Q: What type of work do you perform or have you performed that brings you into**
5 **contact with Anthony Douglas and/or ADE Dumpsters LLC.**

11 A: Yes.

12
13 **Q: Are you familiar with the services that ADE Dumpsters is willing to offer should**
14 **a certificate be permitted by the Commission?**

15 A: Yes, it is my understanding that ADE Dumpsters will use lighter equipment to ensure
16 that property, such as driveways is not damaged. That they will offer a midsize
17 container of about 13.26 cubic yards and that they will offer the option of loading,
18 multiple pick ups in one day, and that the equipment will allow access to areas that
19 are difficult to get to.
20

27 **companies?**
28
29

1 A: The size and availability of his equipment makes this a totally different option for us.
2 We have had the larger containers dropped at a number of our jobsites and have had
3 to also deal with people dumping their garbage in our container. The fact that he has
4 weekend pickups means that we don't have to have the container at our customers
5 jobsite any longer than necessary.
6

7 **Q: Why are the services of ADE Dumpsters needed?**

8
9 A: It helps to have options based on needs. I don't like being locked into one vendor and
10 one rate.
11

12 **Q: In your experience what are the obstacles that you encounter in your profession**
13 **that could be rectified by doing business with ADE Dumpsters?**

14 A: I can have multiple containers dropped on a jobsite allow my crew to scrape a roof
15 faster and we can separate materials onsite so we can recycle the shingles and we
16 send less material to the dump.
17

18 **Q: Is there anything else that you would like to speak to regarding ADE**
19 **Dumpsters?**

20
21 A: Options, options, options. Being able to get the work done fast and having a small
22 footprint while you do that is a plus for my customers. Having the container site
23 cleaned after pickup is a definite bonus and it pleases my customers. The flexibility
24 of scheduling a job on weekends and knowing the container can be delivered.
