

RULE 8
EXTENSION OF DISTRIBUTION FACILITIES

MARGIN ALLOWANCE TOWARD COST OF DISTRIBUTION FACILITIES (continued)

Residential and general commercial customers taking service on Rate Schedules 503 and 504 shall receive a margin allowance not to exceed the NPV of the annual margin over the defined timeframe as determined by the NPV calculation using the sum of the annual basic service charges plus annual distribution margin revenue based on current rates using the customer classes' average monthly therms within the most recent general rate case.

(C)

(C)

Schedule	Avg. Monthly Therm Usage
503	53
504	277

(C)

(C)

Interruptible, industrial, large volume, and transportation customers taking service on Rate Schedules 505, 511, 570, or 663 may receive a margin allowance not to exceed the NPV of the margin to be received from the individual customer over a seven-year period based on an independent calculation for each customer. The annual margin used in the calculation above will be the sum of the annual basic service charges plus estimated annual distribution margin (twelve consecutive months of billing revenue minus gas costs) the Company expects it will receive from the customer based on current rates.

Prior to receiving an allowance, an interruptible, industrial, large volume, or transportation customer must complete a customer load summary that, to the best of the customer's ability, accurately defines the gas fired equipment to be installed, and the estimated days and hours of equipment operation. The Company, in its sole opinion, will determine the customer's estimated annual usage, which may not conform to the customer's expectations.

The Company may offer nonresidential customers served on Schedules 505, 511, 570, and 663 the opportunity to pay line extension costs over time through a facility charge; in which case the Company may require the customer to provide an irrevocable letter of credit in the amount not to exceed the line extension costs and for the timeframe not to exceed the payback period, or another form of security as deemed appropriate by the Company.

AMOUNT DUE FROM CUSTOMER

When the allowance is greater than or equal to the line extension costs attributed to the customer, the distribution facilities will be installed at no additional cost to the customer. If the allowance is less than the line extension costs, then prior to the installation of service, the customer must pay the total of line extension costs less the allowance, multiplied by Federal income taxes, as follows:

$$\text{Amount Due} = (\text{Line Extension Costs minus Margin Allowance}) * \text{Federal Income Taxes}$$

(continued)

RULE 8

EXTENSION OF DISTRIBUTION FACILITIES

EXTENSIONS OF DISTRIBUTION FACILITIES

If, in the Company's sole opinion, no significant barriers exist, the Company will install, own, and maintain distribution facilities necessary to provide gas service to an applicant who meets the requirements to become a customer and complies with the requirements established in this Rule.

Distribution facilities enabling the provision of gas service to a customer include the Company's gas main and other facilities located in the street or right-of-way and the service line, which is the underground pipe running from the Company's main to a Company installed meter that abuts the customer's dwelling or facility. The path of the service line and main to the location of the meter shall be at the Company's sole discretion.

LINE EXTENSION COSTS ATTRIBUTED TO CUSTOMER

Line extension costs are the sum of all estimated costs of furnishing and installing the distribution facilities necessary to provide gas service or additional gas supply to a qualified gas customer.

MARGIN ALLOWANCE TOWARD COST OF DISTRIBUTION FACILITIES

The Company will provide a margin allowance toward the cost of distribution facilities to a qualifying new or modified line extension project as described in this rule. In no instance will a Customer be credited a Margin Allowance that exceeds the line extension costs to install the necessary distribution facilities. Specific margin allowance cap limits for each customer class are stated below, but, in general, the maximum potential margin allowance per service installed is the net present value (NPV) of the margin Cascade forecasts it will receive from the customer over a set number of years as set forth in the following calculation:

$$ALLOWANCE = \sum_{t=1}^7 \frac{R_t}{(1+i)^t}$$

Where:

R_t = estimated annual margin during year t .

i = Company's approved rate of return, 7.894%.

t = years of margin; See Table 1 below

Table 1 - Years of Margin

Dates	Schedules	Years of Margin for t in formula above
Indefinite	505, 511, 570, 663	Seven (7)
March 1, 2025, through February 28, 2026	503 and 504	Two (2)
March 1, 2026, through February 28, 2027	503 and 504	One (1)
After March 1, 2027	503 and 504	Zero (0)

RULE 21
DECOUPLING MECHANISM

PURPOSE:

This Rule describes the revenue-per-Customer Decoupling Mechanism which annually applies a per therm credit or debit under Schedule 594, "Decoupling Mechanism Adjustment" to applicable Customers' bills for the purpose of truing up the annual difference between Margin Revenues and the Authorized Margin Revenues per Customer served as herein defined.

APPLICABILITY:

This Rule is applicable to all Customers served on Schedules 503, 504, 505, 511, and 570.

MARGIN REVENUES

Margin Revenue is the amount of Margin billed in a billing month, adjusted for unbilled margin revenues. Margin Revenue does not include amounts billed for the Basic Customer Charge, or adjustment schedules, such as Schedules 500, 581, 582, 590, 593, 594, 595, 596, 597, and 598.

**RULE 21
DECOUPLING MECHANISM**

(T)

DECOUPLING CALCULATION:

On a monthly basis the Company will perform the following steps separately for each customer class that is applicable to the rate adjustment in this Rule:

- 1) Record Number of Customers per Customer Class
- 2) Determine Actual Margin Revenues
- 3) Determined Authorized Revenue by multiplying the number of Customers per Customer class (No. 1 above) times the Authorized Revenue for the corresponding month per Customer class as established in Tables 1 & 2 above.
- 4) Determine then record the Deferral Amount by subtracting the Authorized Margin Revenue (No. 3 above) from Actual Margin Revenue (No. 2 above).
- 5) Annually determine the new rate to be applied in Schedule 594 by taking the annual sum of monthly Deferral Amounts and dividing the total by forecasted volumes per Customer class.

EARNINGS TEST:

This mechanism is subject to the following earnings test:

If the Company's annual commission basis report demonstrates that the reported rate of return on its rate base for the 12-month period ending at the end of the period for which the annual commission basis report is filed is more than 0.5 percent higher than the Company's rate of return as authorized by the Commission in UG-240008, the Company shall defer all revenues that are in excess of 0.5 percent higher than the Company's authorized rate of return to refund to customers or for another determination as authorized by the Commission in a subsequent adjudicative proceeding.
