

8. Recommended Plan One

A. Overview

The Resource Plan rule permits the Company to prepare alternate resource plans that address perceived shortcomings of a plan based upon the Fixed Modified Accord method. Because PacifiCorp believes that the Fixed Modified Accord Plan may cause negative economic or political consequences to the Company and its customers, PacifiCorp has proposed two alternate plans.

In PacifiCorp's Recommended Plan One, the key difference is that the share of each resource's productive capability, to be established as a fixed Oregon resource, is based on the Company's proposed Fair Share allocation method. While use of this new allocation method will result in each jurisdiction experiencing a relatively minor revenue requirement increase, the Fair Share Method does not require any state to move to either the Modified Accord or the Rolled-In method contrary to long-held positions. The Fair Share Method is also consistent with expected treatment of transmission costs under RTO West. Finally, it completely closes the allocation gap in a way that is simple, supportable and defensible, and fair and equitable to all stakeholders.

B. Description of Fair Share Method.

Fair Share adjusts the allocation method such that each state's revenue requirement is roughly half-way between what it would be under the Modified Accord and what it would be under the Rolled-in approach. This method of equitably allocating one-hundred percent of costs among PacifiCorp's states is consistent with the Resource Plan objectives outlined in Section 1.

As compared to the Fixed Modified Accord Plan, the result is a larger share of pre-merger UP&L plants being established as Oregon resources, and a smaller share of pre-merger PP&L plants. Both Fixed Modified Accord and Fair Share allocate the same share of post-merger plants as Oregon resources. Refer to Exhibit 8 - 1 for the data used to implement Fair Share.

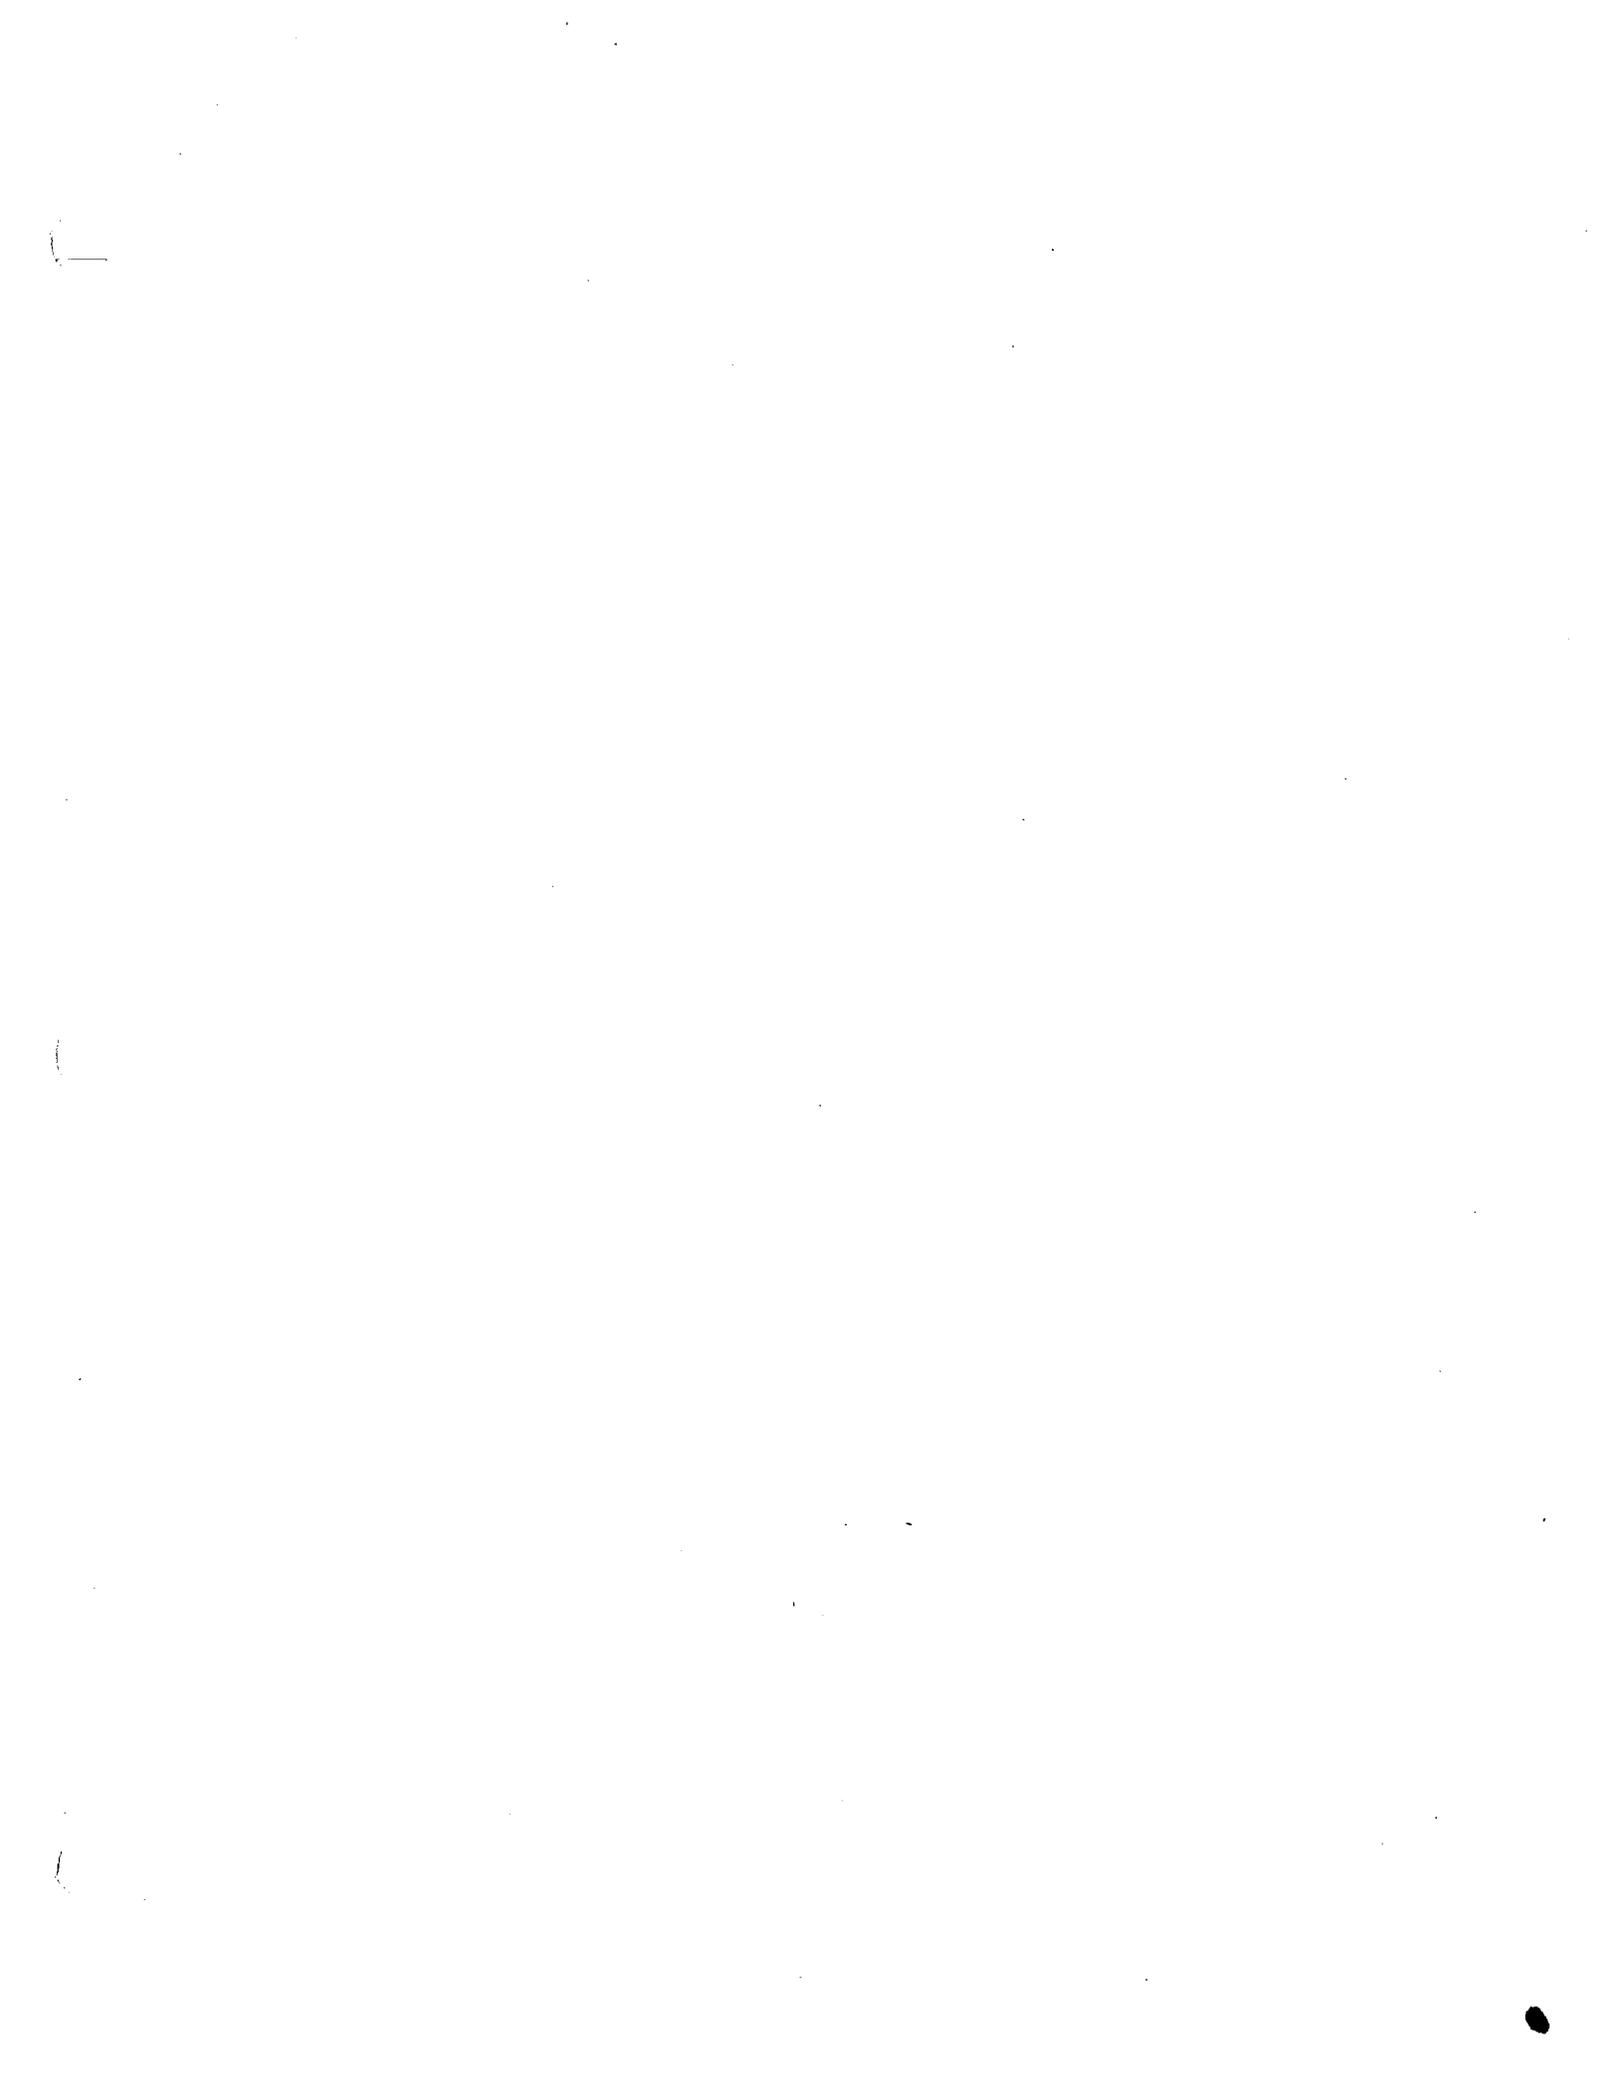

Applying the Fair Share allocation method produces a set of Oregon resources, each consisting of a specific slice of a specific Company resource. The remaining parts of this plan, *i.e.*, allocation between customer classes, selection of the cost-of-service resource stack and proposed disposition of direct access resources, follow the same analyses and procedures as used in the Fixed Modified Accord Plan.

The Company prepared the same series of Exhibits for Recommended Plan One as were presented in Section 7 for the Fixed Modified Accord Plan:

Exhibit 8-2 presents the load-resource balance for the Oregon cost-of-service customers in 2003.

Exhibit 8-3 lists all of the Company's resources and the amount of each resource allocated to Oregon under the Fair Share method. The quantities shown in the Oregon Share column establish the maximum quantity of each resource that PacifiCorp may retain under cost-of-service regulation. As in Exhibit 7-3, the Benchmark columns calculate the amount of capacity to cost-of-service customers and direct access customers if the 52.47%/47.53% split is applied to each of the resources. In recognition of the preference to assign the entire Oregon share of a resource, a "whole slice", to one customer group, the Resource Stack columns show which resources are retained for cost-of-service customers and which resources are assigned to direct access customers.

Exhibit 8-4 provides the detail of the projected load-resource balance for cost-of-service customers for the years 2003 – 2021. Exhibit 8-5 provides the same data for the years 2022 – 2031.

Derivation of Year 2005 Oregon Fair Share Method Divisional Allocation Factors

Pre-merger Weighting	70.0%
Post-merger Weighting	30.0%

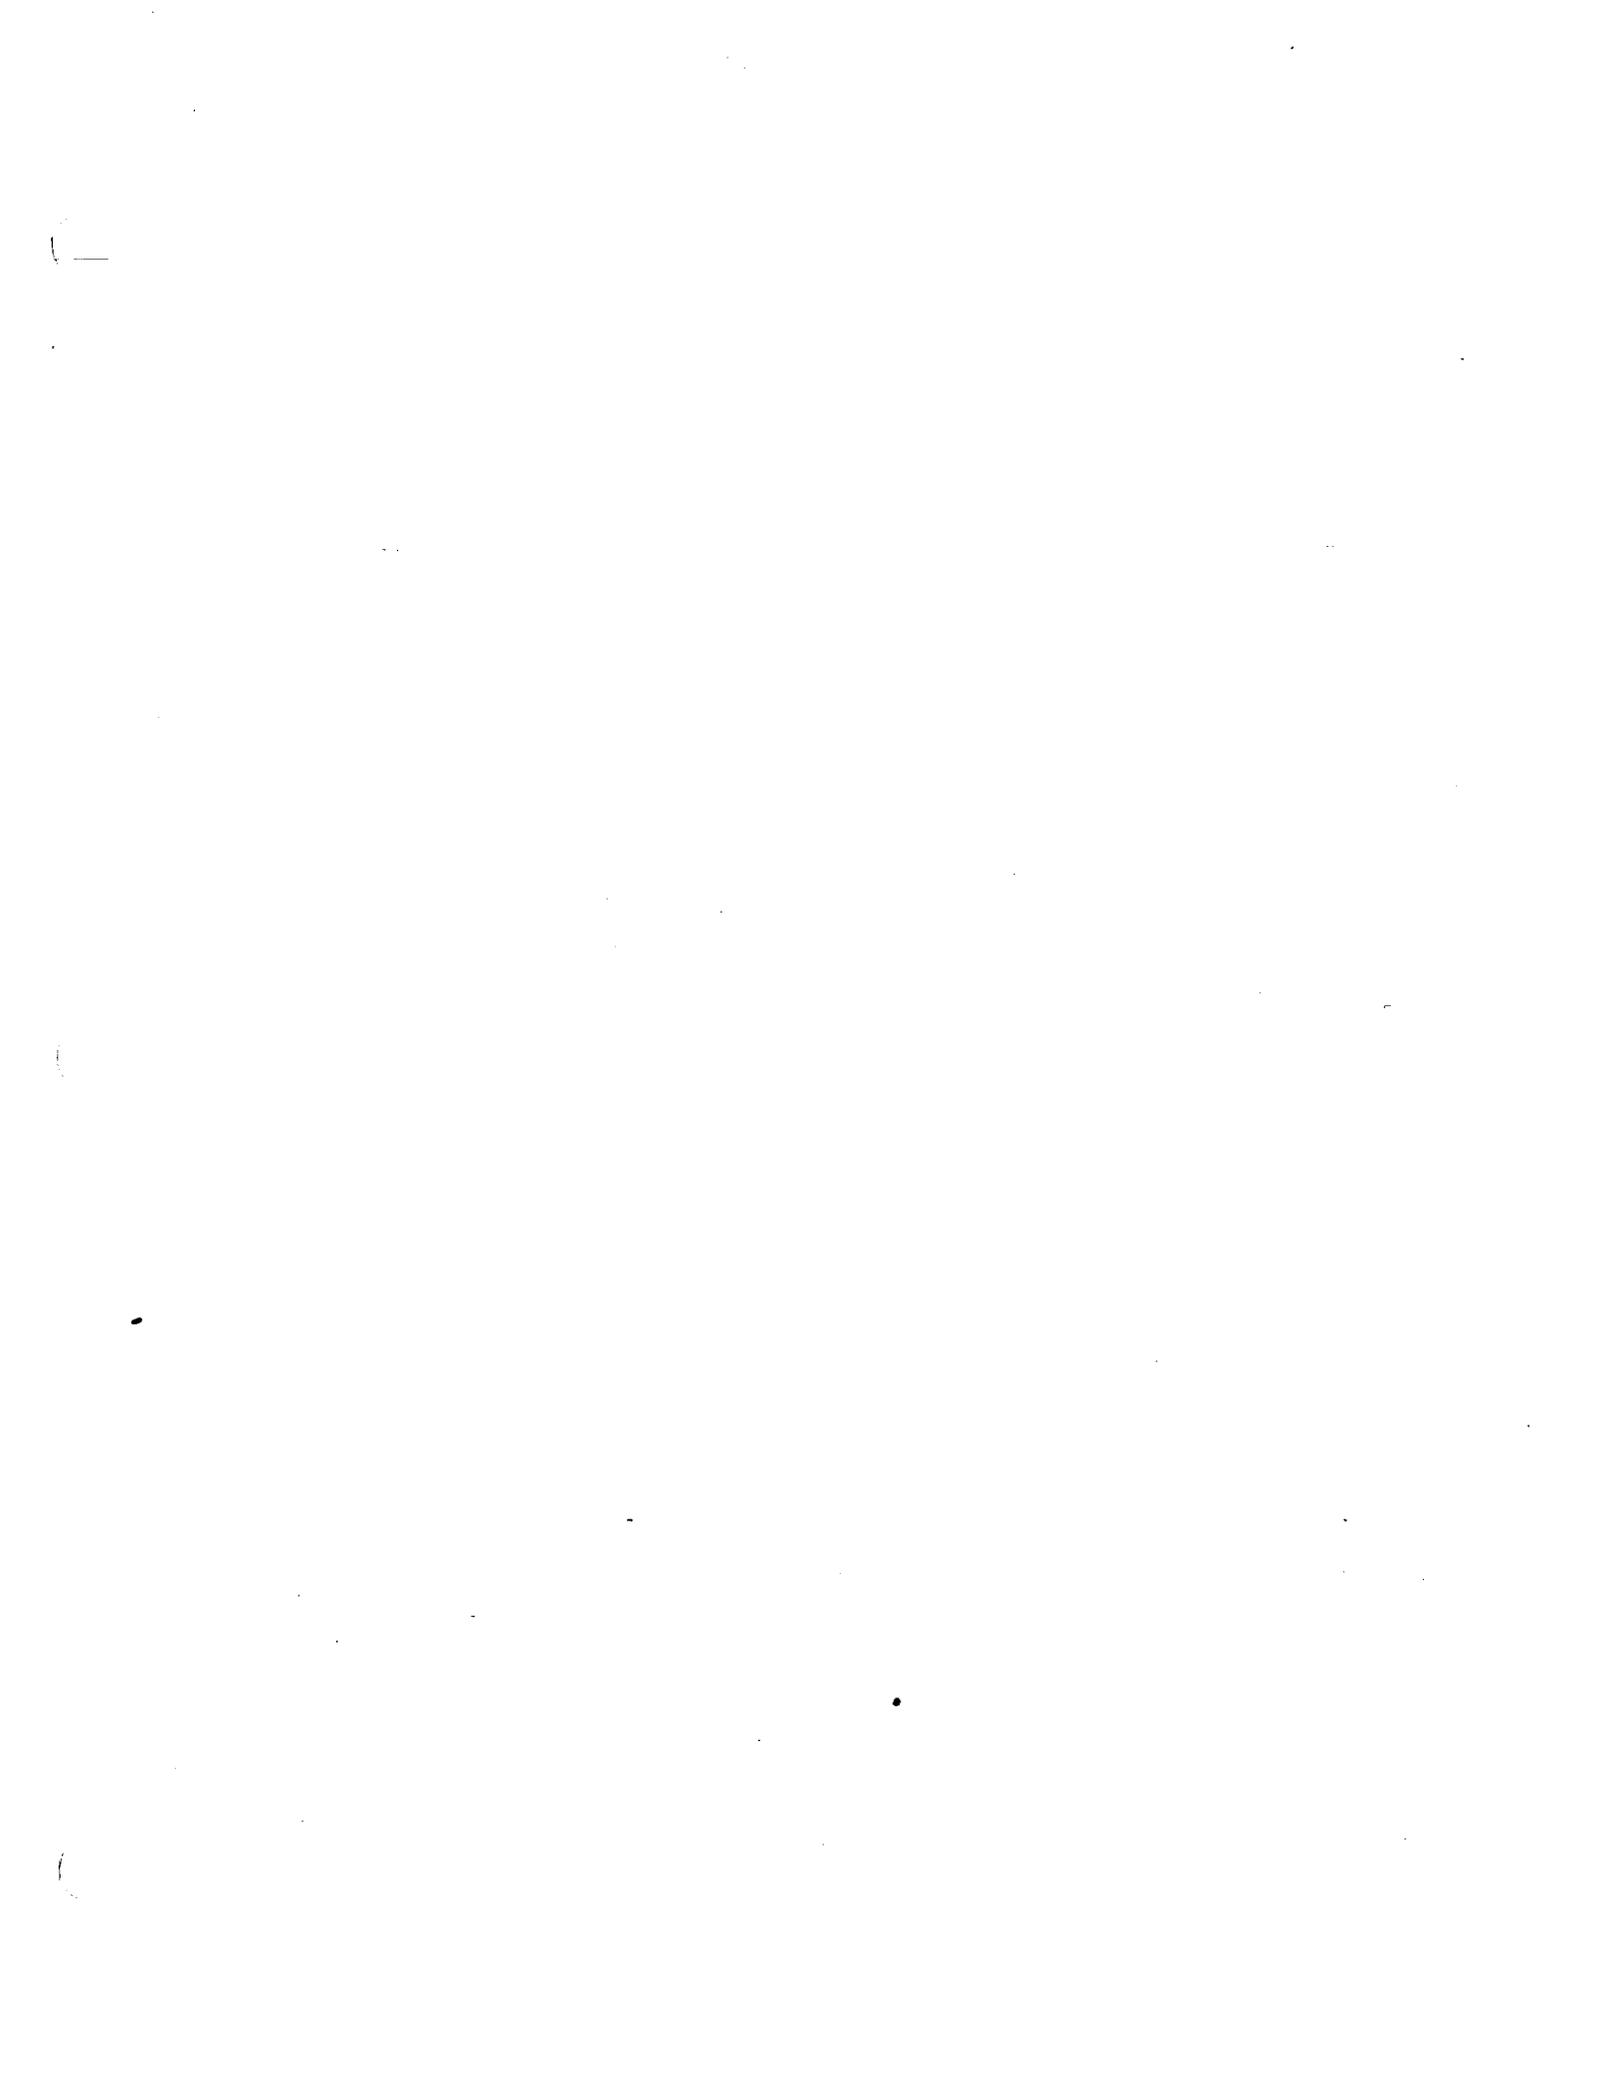

System-Wide Generation Net Rate Base Allocation Factor (SG) 30.7181%
Oregon's share of post-merger generation net rate base in all methods

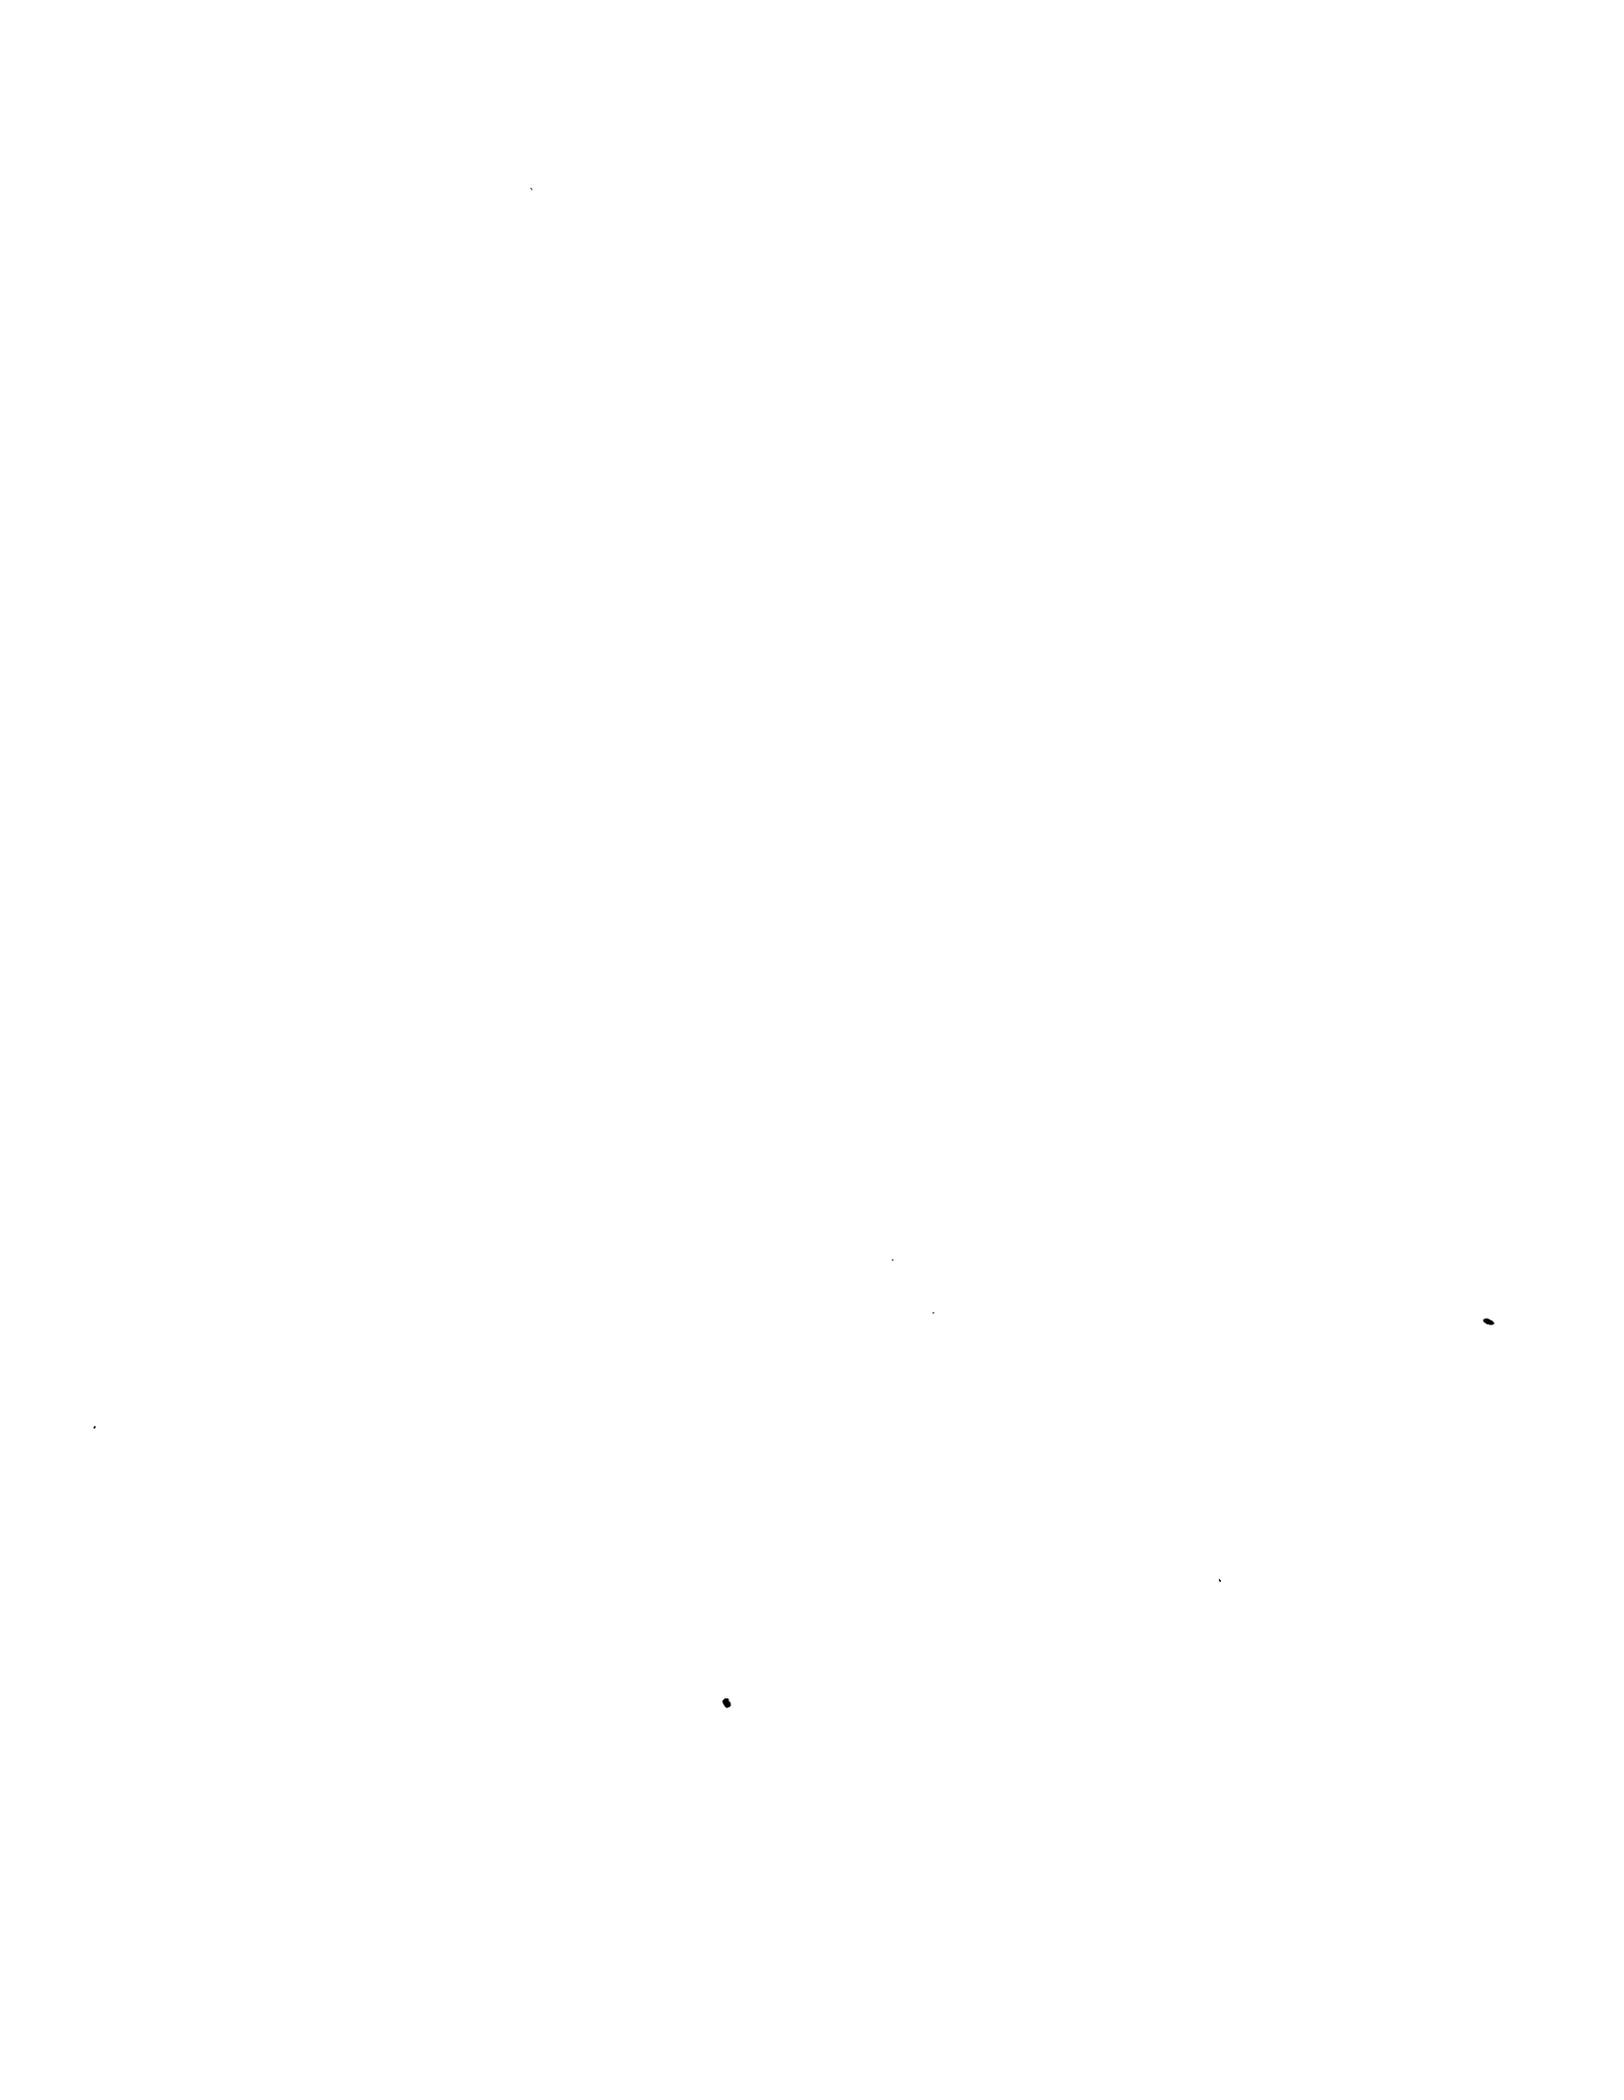

Pure Pre-merger PP&L Net Rate Base Allocation Factor (DGP) 57.8800%
Oregon's share of pre-merger PP&L generation net rate base in Modified Accord

Pure Pre-merger UP&L Net Rate Base Allocation Factor (DGU) 0.0000%
Oregon's share of pre-merger UP&L generation net rate base in Modified Accord

Adjusted Pre-merger PP&L Net Rate Base Allocation Factor (DGP-A) 38.8667%
Oregon's share of pre-merger PP&L generation net rate base in Fair Share Method

Adjusted Pre-merger UP&L Net Rate Base Allocation Factor (DGU-A) 21.5027%
Oregon's share of pre-merger UP&L generation net rate base in Fair Share Method
