# ILIAD, INC.

• ~~John~~ Ingrid - FYI

I called Mr. Dorland to say:

- 1) Since we declared HE and jumped to MPAs, then MPA costs are reasonable to include in eng costs for UTC rate case
- 2) UTC appears to have dropped their objections. See attached.

Re: Alderlake Water System, ID# 26995H, Pierce County

Dear Derek:

I am still trying to get the financing approval from the WUTC to complete the chlorination improvement for the water system.

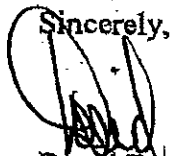

One of the hang ups is the cost of the MPA tests on both wells.

Our engineer believes that the MPA tests should be part of the cost of engineering and new improvement. Your letter of 12/2000, item 3 (attached) directed the water company to perform a MPA tests to determine whether filtration was required along with disinfection. Our engineer calls the MPA tests feasibility engineering a cost necessary for engineering determination. If the tests were positive additional engineering and improvement would have been required.

I would appreciate your opinion in settling this matter.

Please give me a call at (206) 282-4200.

Sincerely,

David Dorland
