**Subject:** RE: Request to transport and dispose of soil and well construction material currently staged at Gasco (NW Natural)

Hi Hank and Tristy – Please see the attached updated PW-10 disposal package.

The waste was anticipated to be accepted for disposal at the Hillsboro Landfill, however due to the total cyanide concentration detected in these soils, Waste Management has approved the waste to be disposed of as non-hazardous industrial waste at their Chemical Waste Management facility in Arlington, Oregon (using an Oregon State-Only waste code X004).

Please move forward with coordinating this effort and let me know if you have any questions.

Thank you,

-Ben.

**Subject:** Request to transport and dispose of soil and well construction material currently staged at Gasco (NW Natural)

Hello Hank and Tristy,

Please see the attached request for transport and disposal of approximately 30-cubic yards of soil and well construction material from Gasco to Hillsboro Landfill. The attached package includes a completed/signed Waste Management profile and associated analytical information.

Please move forward with coordinating this effort and let me know if you have any questions or if Waste Management requires additional information.

Thanks much,

-Ben.
