Re: Docket UE-010283, Schedule 93 Status Report

Dear Ms. Washburn:

Pursuant to the Order Requiring Reporting in Docket UE-010283, this filing is Puget Sound Energy's ("PSE" or "the Company") quarterly report for Schedule 93, Voluntary Load Curtailment Rider. The following discussion and attached worksheet include the information contained in the Commission's June 13, 2001, letter to the Company.

Response to Specific Items

Items 1-8: Please find the attached worksheet containing this information. This worksheet has also been provided to Commission Staff electronically.

9. Description of the impacts from the curtailment program on the daily dispatch of its electric system.

Information on the enclosed worksheet demonstrates that the highest hourly average reduction in demand during a curtailment period was approximately 1.3 MW. This is calculated by adding the Average kW per Hour Curtailed for event 165 and 166, which occurred on April 10, 2001, from 7:00 to 10:00 a.m.. This level of demand reduction did not have a significant impact on the Company's daily dispatch of its electrical system, including an impact in day-ahead market trading.

10. Analysis of the impact this tariff has on the Company's power supply costs.

As mentioned directly above in 9, the hourly demand reductions experienced during the reporting period were not large enough to create a significant impact on the Company's power supply costs or operations. At the curtailment levels experienced during March through June of 2001, the energy curtailed by participants has a minimal impact on real-time trading volumes; i.e., during periods when the Company is long on a real-time basis, there is slightly more energy available to sell into the real-time wholesale market and during times that the Company is short on a real-time basis, the Company would not have to purchase the curtailed energy in the real-time market.
