Complaint Information

Business

Please explain your complaint in detail.

In reference to TS 042184.... Kitsap Transit and private foot ferry operators have applied for certification to run foot ferry service from Harper , located in South Kitsap County . My understanding is that the State of Washington has thought about using the Southworth ferry dock as a foot ferry terminal also. In Addition Kitsap County roads and Kitsap Transit have conflicting design for the section of Southworth Drive located at the Harper Dock. I am requesting a delay in the awarding certification to Kitsap Transit and private operators of foot ferry service at Harper dock until present issues can be sorted out. Is the Southworth terminal or the Harper dock the most viable solution for foot ferry service?

Did you speak to a supervisor from your utility or transportation company?

Yes

If "Yes", what was the result?

Dick Hayes, executive director , of Kitsap Transit has spoken with many of the residence of Harper . He has attended a small residential meeting and is hold public meetings on Jan 24 and 25 in South Kitsap . They have been above board and act in a professional manner. He makes a good case for Harper foot ferry service. However many question still need to be answered.

What do you think the company should do to resolve your complaint?

I think the Washington Utilities transportation Commission should promptly study the issue TS 042184 and make a determination of certification of Kitsap Transits request , considering the possible use of the existing SouthWorth ferry terminal. I think that co-operative use of the terminal at Southworth should be looked at closely.
