Re: Proposed Sale of Puget Sound Energy

Dear Ms. Woehrlin:

Thank you for your letter to Chairman Sidran regarding the proposed sale of Puget Sound Energy (PSE). As you observe, the utility announced its proposal to be acquired by an investment group on October 26, 2007.

State law requires that this transaction will require approval from the Washington Utilities and Transportation Commission (UTC). The UTC will review the proposal and hold a hearing to provide an opportunity for members of the public to express their opinions concerning the proposed sale. PSE has yet to file a formal request for the necessary approvals, so a hearing date has not yet been set. The UTC will add your name to the list of interested persons so that you will receive notification of the hearing date, time and location.

Thank you again for your letter and for your interest in the electric utilities that serve customers in Washington.

Sincerely,

David W. Danner
Executive Director

Patricia Woehrlin

RECEIVED
OCT 31 2007
CHAIR, WUTC

Dear Mr. Sidran:

I am writing to share my deep concern about Puget Sound Energy's plan to be purchased by or merged with private investors from Canada and Australia and to ask you to consider not permitting it to go forward. From my perspective, a utility should remain in the public domain and to have it owned by other countries seems very wrong. This is an unusual reaction from me since I don't tend toward the paranoid or fear-based side of the ledger on issues. Please do not let this occur.

Many thanks for reading my letter and considering my request.

Sincerely,

Patricia Woehrlin
