Thank you,

An email or letter addressing all five crossings will be just fine. Our new Executive Director is Jeff Killip and you can send it through me.

Thanks again,
Mike

Mr. Miller,

We understand that the Port of Moses Lake's NCBR plans have changed and the Port no longer intends to construct or reconstruct the five highway-rail grade crossings previously petitioned to the UTC, listed below with road name and UTC docket number:

TR-100072 Graham – Construct
TR-100073 Tyndall – Construct
TR-100074 Forbes – Reconstruct
TR-100075 Randolph – Construct
TR-100076 Turner – Construct

If these projects have been cancelled, UTC staff would ask the Commission to rescind the related orders and close these dockets.

Please advise if the Commission should rescind these orders. A simple reply to this email in the affirmative will suffice.

Thank you,

Mike Turcott

Milt,

In 2010 the Port submitted 5 Petitions for the Segment 2 alignment. The alignment on Segment 2 has now changed significantly so the previous Petitions are no longer valid. The UTC would like to have the petition Orders rescinded by the Port since they will not be implemented.

The Port needs to address a letter (PDF) to UTC Executive Director/Secretary Amanda Maxwell asking the Commission to rescind the following Petitions:

TR-100072 Graham – Construct
TR-100073 Tyndall – Construct
TR-100074 Forbes – Reconstruct
TR-100075 Randolph – Construct
TR-100076 Turner – Construct

The PDF letter can be emailed to Mike Turcott at the UTC for further handling.

Thank you,
Bryan

Hi Bryan,

The UTC docket numbers for the five earlier crossing petitions are listed here:

TR-100072 Graham – Construct
TR-100073 Tyndall – Construct
TR-100074 Forbes – Reconstruct
TR-100075 Randolph – Construct
TR-100076 Turner – Construct

I've attached the order granting each of the petitions.

Yes, the Port should ask the Commission to rescind the orders in each of those dockets. One letter or email from the Port to UTC Executive Director/Secretary Amanda Maxwell addressing all five dockets will suffice. You can send this directly to me.
