Washington Utilities and Transportation Commission  
Chandler Plaza Building  
1300 S. Evergreen Park Drive SW  
P.O. Box 47250  
Olympia, WA 98504-7250

Subject: Waste Management–North Sound and Waste Management - Marysville, divisions of Waste Management of Washington, Inc. (G-237); Tariff # 19

Enclosed are revised pages 2, 21-25, 27-32, 34, 39, and 41-44 to the above-referenced tariff. The purpose of these tariff revisions is twofold. First, residential and commercial rates are being adjusted due to the increase in the King County disposal fees. Second, the revisions also reflect the change in the commodity credits for residential and multi-family customers receiving recycling collection services.

The King County Council approved the increase in disposal fees from \$120.17 to \$134.59 per ton as reflected in King County Ordinance No.2016-0386, a copy of which is included with this filing. The increased rates, if approved by the Commission, would approximately increase Company revenue by \$753,000, and residential and commercial garbage rates by approximately 5.8%. The effective date of these proposed tariff revisions is January 1, 2017.

As mentioned above, the tariff revisions also to reflect the change in the commodity credits for residential and multi-family customers receiving recycling collection services. These tariff revisions reflect a decrease of the current commodity credit from \$1.04 to \$0.54 per month for residential customers in Snohomish County and a decrease from \$1.13 to \$0.62 per month for residential customers in King County. Multi-family commodity credits are decreasing proportionately to the decreases to residential customers. As a result, this filing also seeks approval to implement an increase in customers' solid waste collection rates in addition to the disposal fee increase.

These decreases in the commodity credits are due to the overall changes in commodity values and tonnages since our last commodity credit adjustment on January 1, 2016. The proposed effective date of the revised recycling commodity credits is January 1, 2017.

As a reminder of context, the change in commodity credits are being submitted mid-way through the two-year Revenue Sharing Plans with Snohomish and King Counties for 2016 - 2017. It only reflects the changes to the commodity rebates due to actual prices and quantities over the past 12 months. It does not make other adjustments that will be required upon completion of the Plans. In accordance with RCW 81.77.185 and the approved Plans, the Company will continue to retain up to 45% (Snohomish County) and 47.5% (King County) of recycling commodity revenues to be spent on program activities. At the end of the two-year period, these revised commodity credits will be subject to additional adjustments to reflect any incentives earned by the Company, and amounts of retained revenue over or under spent to comply with the tasks in the Revenue Sharing plans. This filing includes a report on expenditures to date, but does not indicate any amounts over or under spent because the Plan activities are still ongoing. Along with any changes attributable to commodity values and tonnages during the next 12-month period, retained revenue adjustments will be addressed in our filing in 2017 at the completion of the two-year plan period.

Enclosed for your review are our accounting work papers. Customers will be notified of the change in their collection rates and their commodity credit adjustment on their next regularly scheduled billing after the approval of the Commission. In addition, the counties have been notified of these proposed tariff changes.
