When we initially called in the service, it was only 1 of 2 gas lines on edge of property line that was located. We struck the one not located. The ticket above does state property line to property line, not edge of ROW. So it seems like a fine on a technicality....

Cheers,

William Kullman

This is the ticket that was made and valid when we dug and hit the gas line that day. Not sure if we were completely covered in the area that we hit the gas?...
