WATER SERVICE
RULES AND REGULATIONS

Rule 9 – Responsibility for, and Maintenance of, Services

'Point of Delivery' – The point at which water will be delivered to and received by the customer will be on the property line of the customer's property at a point designated by the Utility.

The Utility will install its meter or other connection device at the Point of Delivery, except, at its option, the Utility may install its meter at some other agreed point on the property of the customer, provided that in such event the property line will nevertheless be deemed the Point of Delivery.

The customer will assume all responsibility after Point of Delivery for water supplied by the Utility. The Utility will be exempt from all liability for loss or damage caused by leakage or escape of water furnished by the Utility, after water has passed the Point of Delivery. If the customer has an Approved Backflow Prevention Assembly installed, the assembly must be tested annually by a certified Backflow Assembly Tester specialist.

All service pipes and fixtures on the customer's side of the Point of Delivery shall be provided and must be maintained and protected from freezing at the customer's expense. Where there are leaking or defective pipes or fixtures, the water may be turned off at the option of the Utility until properly repaired. The Utility may require any service to be equipped with freeze prevention devices to be used during cold weather conditions instead of permitting water to run continuously from faucets.
WAC 480-110-445

Rule 10 – Access to Premises

The Utility's regularly authorized agents or employees will have access to the premises of the customer at reasonable hours for meter reading, inspection, connection, disconnection, repair or removal of the Utility's property. Where the meter has not been read, a minimum bill will be rendered and adjusted when the next succeeding meter reading is available. After properly notifying the customer, the water Utility may discontinue service for refusing to allow access per WAC 480-110-305 and 480-110-355.

WATER SERVICE
RULES AND REGULATIONS

Rule 17 – Discontinuance of Service (cont'd)

- a. Delivered notice - The Utility must deliver a second (2nd) notice to the customer and attach it to the customer's primary door. The notice must contain a deadline for compliance that is no less than twenty-four (24) hours after the time of delivery that allows the customer until 5:00 p.m. of the following day to comply, or
- b. Mailed notice - The Utility must mail a second (2nd) notice, which must include a deadline for compliance that is no less than three (3) business days after the date of mailing if mailed from within the state of Washington.

Disconnection notice will expire after ten (10) business days from the first day that the Utility may disconnect service, unless other mutually agreed upon arrangements have been made and confirmed in writing by the Utility. If mutually accepted arrangements are not kept, the Utility may disconnect service without further notice.

WAC 480-110-355

Rule 18 – Sprinkling and Irrigation

Water used for sprinkling and irrigation must be paid for at the regular prescribed tariff rates for such service. The hours for such use will be as prescribed from time to time by the Utility, subject to protest by any customer affected and reviewed by the Commission. During peak use months (June through September), and at such other times when demand may be high, the Utility may prohibit or limit sprinkling and irrigation to preserve water for domestic consumption.

No person will use water for sprinkling or irrigation purposes during any fire in the area, and all sprinkling or irrigation must be stopped immediately when a fire alarm is sounded. Water use may resume three (3) hours after the fire has been extinguished.

WATER SERVICE
RULES AND REGULATIONS

Rule 28 – Damage and Repairs Charge

The Utility shall be responsible for maintaining meter boxes and their contents, along with fire hydrants and services on the street side of the Point of Delivery. However, if any customer or a customer’s contractor causes damage to meter box, fire hydrant, pipes, mains or other equipment of the Utility’s maintained infrastructure, the customer will be responsible for paying the Damage and Repairs Charge as specified in **Schedule X**. See Rule 11.

Rule 29 – Fire Hydrant Meter Rental

Building contractors or others with a need for temporary service from a fire hydrant(s), other than for fire suppression purposes, are required to rent a fire hydrant meter from the Utility and meter their usage. There is no charge for the rental of the fire hydrant meter, if the equipment is not damaged, but there is a security deposit amount identified on **Schedule X**. When the fire hydrant meter is returned, the temporary customer will be charged for the water consumed at the consumption rate identified in **Schedule 2**.

If the fire hydrant meter is returned within three (3) days of the agreed-upon return date, the security deposit will be returned in full. If the equipment is returned more than three (+3) days after the agreed-upon return date, the security deposit will be forfeited by the customer.

The security deposit may be waived if the customer gives a credit card authorization for the full replacement cost of the meter. If the item is returned on time, the credit card draft will not be drawn. If the equipment is returned but more than three (+3) days late, a draft will be drawn on the credit card in the amount of the security deposit identified on **Schedule X**. If the equipment is not returned at all, a draft for the full replacement cost will be drawn.

Rule 30 – Compound Meter Procedures

‘Compound Meter’ – is a combination of a large meter and a small meter, with a special changeover valve to accurately measure an extremely broad range of flow rates.

When the Utility determines that a compound meter is need to accurately measure flow rates, then a compound meter is billed as a single customer; this is done by applying the larger meter size to determine the monthly metered rate service per Schedule 2 for base rate and usage blocks; the total billed usage amount is determined by combining the usage of both the large and small meters.

WATER SERVICE**RULES AND REGULATIONS****Rule 31 – Water Leak Procedures**

When the Utility determines that a leak has occurred on the customer's property, the Utility will adjust the customer's original bill after the customer submits a bill from a plumber, contractor, or other evidence that the leak has been repaired. The Utility must re-calculate the customer's bill for the *'relevant time period.'* The *'relevant time period'* for this adjustment will not exceed two (2) months for any given leak. The customer's bill will be adjusted by:

1. Estimating the customer's *'projected normal usage'* charge during the relevant period(s) and calculating this amount according to the usage blocks and usage rate(s) shown on **Schedule 2**.
2. Calculating the *'excess usage'* charge during the relevant period using one-fifth (1/5) the usage blocks and usage rate(s) shown on **Schedule 2**.
3. Crediting the difference between the original bill for the relevant period and the sum of the bills described in Steps 1 and 2.

'Projected Normal Usage' – as an estimate of what the customer's water consumption would have been had there been no leak. This estimate will be based on the same period from the prior year.

'Excess Usage' – as the actual metered usage minus the projected normal usage.

Note: The credit described in this Rule is available to a customer only once every twenty-four calendar months.

SCHEDULE NO. 3
READY-TO-SERVE (RTS) SERVICE

Availability

This schedule is available in all Water Service Areas served by the Utility and at Utility’s option and capability to maintain Department of Health’s standards of quantity and quality.

Applicable

To any property owner who has completed and signed a Water Service Application, paid all applicable fees required for meter service connection, and had Water Service Application accepted in writing by the Utility; and for whom the Utility has installed the direct connection from the water system to the applicant’s property line. Applicable to any customer, where meters have not yet been installed.

This class of service is considered temporary.

Conditions

The charge for this service is not subject to cancellation or reduction for seasonal or temporary periods unless seasonal rates apply per this tariff. This charge will be the monthly minimum bill for this class of service. At the time water service begins, the customer shall be transferred to Schedule 2, Metered Service.

The Ready-to-Serve charge may be discontinued upon receiving written request from the customer or for non-payment of the Ready-to-Serve charge. Termination of the charge will allow the Utility to remove the service line and/or connection. This disconnection or removal will allow the Utility to make that available service capacity to supply other connections on the water system.

After a service line and/or connection has been removed for discontinued service, future service to the property will require a new application for service, payment of service connection charges, and will be subject to the availability of service capacity at such time as the future application for service is made.

Monthly Charge

Rate

Each connection or customer (single connection).

SCHEDULE NO. 4
SERVICE CONNECTION CHARGE

Availability

This schedule is available in all Water Service Areas served by the Utility and at Utility’s option and capability to maintain Department of Health’s standards of quantity and quality.

Applicable

Applies to all new applicants for properties not currently served and within the Commission Service Area (as defined in the tariff) for the Utility only when surplus system capacity is available, and a direct connection can be made to an existing main that has adequate hydraulic capacity.

Conditions

1. A charge will be made the first time a customer's service pipe, 3/4-inch or smaller, is connected from the Utility's main to the customer’s property line. This charge does not include the cost of a service meter, or its installation. A service meter will be furnished, installed, and maintained by the Utility without direct cost to the customer.
2. The Utility owns and maintains all materials involved in making a service connection.
3. The service connection charge must be paid before the water is turned on.
4. In addition, when it is necessary to cross an existing road (by boring or cutting) the cost of the crossing and road permit fees or other charges, will be in addition to the Service Connection Charge.
5. Service meter will be placed in a suitable meter box located at the customer’s property line, except when this is not practicable. The service meter will be installed upon the customer’s premises in some convenient location approved by the Utility where the service meter, will at all times, be accessible for reading, inspection, and testing. (See Rule 9 & 10)
6. Service Connections will be installed within seven (7) days from payment, unless prior arrangements in writing are agreed upon by both the customer and the Utility. At the time the service connection is installed, the customer shall be transferred to Schedule 3, Ready to Serve.
7. Any Service Connection larger than 3/4-inch service requires a ‘Labor and Material Contract.’

SCHEDULE NO. 6
CAPITAL IMPROVEMENT SURCHARGE

Availability

This schedule is available in all Water Service Areas served by the Utility and at Utility's option and capability to maintain Department of Health standards of quantity and quality.

Applicable

Applicable to any connection or customer of the utility company.

Conditions

The charge for this service is not subject to cancellation or reduction for seasonal or temporary periods, unless seasonal rates apply per this tariff. This charge will be the monthly minimum bill for this class of service and will be in addition to other charges as provided in this tariff.

Monthly Charge

Rate

Each connection or customer (single connection)

\$4.88

Purpose

This system surcharge is to repay the loan taken to pay the invoices for replacement and installation of two well pumps that are required to ensure continued assurance of water availability for our customers.

This surcharge will expire on February 28, 2027, or upon recovery of \$63,646.10 for loan.

Principal, interest, and state excise taxes, whichever occurs first.

SCHEDULE NO. 9
FIRE HYDRANTS INSTALLATION

Availability

This schedule is available in all Water Service Areas served by the Utility and at Utility's option and capability to maintain Department of Health standards of quantity and quality.

Applicable

To the installation of fire hydrants, where requested by customer(s).

Conditions

Fire hydrants will be constructed only after a customer has made a deposit equal to one-half (1/2) of the estimated cost of installation of the hydrant and then only where the Utility can provide fire flow, which meets minimum standards for state and county or, if applicable, city ordinance.

Installation of a fire hydrant by the Utility shall not constitute a warranty or guaranty by the Utility that a fire will be extinguished. The customer is advised at all times to maintain adequate fire insurance to cover the customer's expected loss from a fire, which may occur.

The Utility will deny a customer request for a hydrant if the system serving the customer cannot provide the level of service required for fire flow under state and county or, if applicable, city ordinance.

Installation Charge

Rate

Each fire hydrant.

FIRE HYDRANTS SERVICE

Availability

This schedule is available in all Water Service Areas served by the Utility and at Utility's option and capability to maintain Department of Health standards of quantity and quality.

Applicable

To any person or entity intending to obtain water using a fire hydrant or other valve connection within the Utility's distribution system.

This Schedule does not apply to fire trucks and related personnel engaged in firefighting activities.

Charges

Usage rates are set out on **Schedule 2** of this tariff.

Security Deposit is outline in **Rule 29** of this tariff.

Account Set-up Charge is outline in **Rule 20** of this tariff.

Conditions

1. Any person, corporation or other entity desiring service under this Schedule must first set-up an account with the Utility as outlined in Rule 20 of this tariff. The Utility will provide the necessary forms for that purpose.

SCHEDULE 12
FIRE FLOW INSTALLATION

Availability

This schedule is available in all Water Service Areas served by the Utility and at Utility's option and capability to maintain Department of Health standards of quantity and quality.

Applicable

For the customer(s) that desire to install fire suppression systems within their residences that are served by the Utility.

Charges

Installation of Fire suppression system - Time and Materials (non-recurring)
Inspection Fee for Fire suppression system - \$N/A (annual)

Conditions

1. Customer shall construct, at its own discretion, its own fire suppression system on customer's property. Customer is providing and constructing such system based upon customer's own knowledge and for customer's own purposes. Customer will retain ownership and shall be responsible for the maintenance and operation of the fire suppression system.
2. Utility shall provide to customer the facilities to provide water to the customer's fire suppression system, consisting of a leak detection device being no larger than a one-inch (1") meter and connection to Utility's water main, which will flow through a leak detection device to be installed by the Utility. The connection, leak detection device and assorted appurtenances shall be provided to customer on a time and material basis. Meters larger than one inch (1") will be considered upsized and will be charged in accordance with Schedule 2. Said connection shall be used only for the provision of the fire suppression system and shall not be used for any other purpose, including, but not limited to, domestic water service. Customer must provide, at customer's sole expense, a backflow prevention device, which complies with Utility's Cross Connection Control program as defined in Schedule 8 of this tariff.
3. The annual inspection fee set out above shall be to reimburse the Utility for inspecting the point of connection of the one-inch meter.

4. Customer agrees to pay all charges for the installation of facilities and the annual inspection fee within thirty (30) days of date of invoice for such charges. Failure of customer to pay such charges in a timely manner will result in disconnection of the facilities provided under this agreement.
5. Customer covenants and agrees that it shall be responsible for maintaining the backflow prevention device in working order. The backflow prevention device shall be inspected and tested, at the customer's expense, by a certified BAT specialist as required under WAC 246290-490. The Utility will maintain a list of certified BAT specialists that are acceptable to the Utility and the customer may choose from any such BAT specialist on the Utility's list. A copy of satisfactory certification will be provided to Utility prior to the date of providing service under this agreement and on an ongoing basis as testing certifications are required by state law and regulation (currently on an annual basis). The backflow prevention device shall be accessible to the Utility and its employees at all times.
6. Customer may be required to sign a written agreement before commencement of work by the Utility.
7. Customer shall indemnify and hold Utility and Utility's directors, officers, employees and agents harmless from any claim for damage to property or personal injury or death resulting from or in connection with the work done under this agreement or the facilities provided under this agreement, including attorney's fees and court costs, except that which is the result of the gross negligence or intentional misconduct of Utility or a violation of RCW 19.122 by the Utility. This condition 6 is in addition to, and not in lieu of, the Limitations of Liability set out in **Rule 26** of this tariff.

FIRE FLOW INSTALLATION (cont'd)

Conditions (cont'd)

- 8. Customer understands and agrees that Utility is not acting as an insurer of customer or customer's property or property of others on the property. Utility shall not be liable for any loss of life, personal injury, loss, or damage to property of customer, its family members, agents, guests or invitees whether or not caused by failure of the facilities and customer shall hold Utility and Utility's directors, officers, employees and agents harmless from any such claim. Utility makes no warranties or representations as to performance of the facilities. Nor shall Utility be liable under any theory in law or equity to customer or customer's family members, agents, guests or invitees for any consequential, incidental, punitive or other loss or damage beyond direct damages caused by Utility's gross negligence or intentional misconduct or a violation of RCW 19.122 by the Utility, and then only in an amount not to exceed ten-thousand dollars (\$10,000.00).
- 9. Customer hereby agrees to purchase insurance, in such amount as customer deems adequate, to protect against loss by fire, which insurance customer agrees shall be customer's sole source of recovery for failure of the facilities, except for Utility's gross negligence or intentional misconduct or Utility's violation of RCW 19.122. Said insurance policy shall include a waiver of subrogation as applied to Utility, its directors, officers, employees and agents.
- 10. Only closed loop or single/double head loop fire suppression systems may be connected to the Utility's system.
- 11. Authorized use of water through a fire suppression system meter shall be billed to the customer at the normal water usage rates established by the Utility on **Schedule 2**. Authorized use of water through a fire suppression system meter is limited to fire suppression system testing, maintenance, or actual fire prevention or control.
- 12. Unauthorized use of water through a fire suppression system meter shall be billed to the customer at a rate of twelve (12) times the water usage rate established by the Utility on **Schedule 2**.

SCHEDULE NO. 14
IRRIGATION SERVICE

Availability

This schedule is available in all Water Service Areas served by the Utility and at Utility's option and capability to maintain Department of Health standards of quantity and quality.

Applicable

To water service through a connection used primarily for irrigation and not for service to provide domestic consumption. This service is applicable to lot(s) that is not buildable or is designated as open space on filed plats or as may be agreed by contract between the Utility and customer (or customer's predecessor-in-interest). Incidental use for drinking fountains or other domestic consumption shall not change the primary use for irrigation purposes.

Monthly Charge

Monthly rates are set out on **Schedule 2**.

Conditions

1. Consumption under this Schedule for each billing period beginning with the period covered by the June bill issued by the Utility and ending with the period covered by the October bill issued by the Utility (*Restricted Period*) is limited to one-hundred and seven (107) cubic feet per day measured as a monthly total.
 - a. Cubic feet per day average is computed as billed usage divided by the number of days in that billing cycle.
2. Consumption that exceeds the limit of one-hundred and seven (107) cubic feet per day in one billing period may, at the discretion of the Utility, result in service being restricted or discontinued for the remainder of the *Restricted Period*. If the computed per day usage is less than the average one-hundred and seven (107) cubic feet per day in anyone billing cycle, the difference cannot be *banked* and used in subsequent billing periods.
3. Each customer must install and maintain a rain sensor as part of their irrigation service so that irrigation will not occur when there is rain.

SCHEDULE NO. 14
IRRIGATION SERVICE (cont'd)

Conditions (cont'd)

4. Each customer will follow a '*best practices*' approach to the use of irrigation service. This '*best practices*' approach includes, the following:
 - a. Revisiting existing landscaping to determine if modifications are needed to reduce use of water.
 - b. Irrigating grass areas at a rate of no more than one-inch (1") per week.
 - c. Sizing irrigation sprinklers and installing irrigation sprinklers to provide as near a uniform coverage of grass-landscaped areas as feasible.
 - d. Not using watering practices that involve a '*sponge*' approach where water is applied in one area with the thought that it will eventually provide coverage of other areas through the water traveling over, through or under the ground.
 - e. Not irrigating when the temperature is forecasted to exceed ninety degrees Fahrenheit (90 F).

5. An irrigation customer may request to temporarily suspend service for a period not to exceed nine (9) months. An irrigation customer that requests reinstatement of service at the same location within nine (9) months shall be required to pay a Service Reinstatement Charge set out below in **Condition No. 5(a)**, in addition to the Account Set-up Charge outlined in **Rule 20** and Reconnection Visit Charge outlined in **Rule 6** of this tariff.
 - a. Service Reinstatement Charge shall equal the base rate for service from **Schedule 2** of this tariff, less the cost of any water embedded in the base rate, times the number of months the service has been disconnected. If there has been usage during the period of disconnection, such usage will be included in the first bill after reinstatement at the applicable rate from **Schedule 2**. Such usage included in the first bill after reinstatement shall not be included in calculating the one-hundred and seven (107) cubic feet per day limitation outlined above in **Condition No. 1**.

SCHEDULE NO. 14
IRRIGATION SERVICE (cont'd)

Conditions (cont'd)

- b. If service is not reinstated within nine (9) months, service will be deemed disconnected and any subsequent request for reconnection will be subject to availability of capacity.
 - c. In lieu of disconnection, a customer may request a credit for service during the period covered by the Utility's November bill to the period covered by the Utility's May bill ('Discount Period'). The credit is limited to twenty-five percent (25%) of the base rate. Credit will not be given against usage, surcharges, or any charge other than the base rate. If the customer requests a credit, the customer's meter(s) will not be read during the 'Discount Period'. All usage during the 'Discount Period' will be only for such purposes as testing, cleaning, and repairing the irrigation system. 'Discount Period' usage included in the June bill shall not be included in calculating the one hundred and seven (107) cubic feet per day limitation outlined above in Condition No. 1.
6. If the Utility issues a 'no irrigation' order for the water system the customer is connected to, the customer must immediately cease irrigation until the 'no irrigation' order is lifted.
