Subject: Customer meeting to discuss status of water system

Attention Valued customers,

As you well know our water system is out of compliance with Washington State Department of Health at this time. It is in every homeowner's best interest to get together and discuss the impact that this is having on the water system and also what impact that it is doing to YOU the water users. Therefore, the water company wishes to organize a meeting to discuss courses of action to correct the problems, and to discuss the current financial state of the company and what impact that will have on the homeowners. The Washington Utilities and Transportation Commission regulates all public utilities and it is their responsibility to regulate all rates to guarantee that the utility has enough operating income to pay for the operation of such utility. The WUTC also guarantees the utility a rate of return or profit. It is important that everyone comes to this meeting so they can hear what is going on with the system, how long will it take the company to fix what is wrong, how much it is costing the water company, how it is and/or will effect the water system user, and what can you the water system user do to help us get these problems solved so we all can "get on with our lives." We will have our company engineer and hopefully someone from WUTC and/or Dept. of Health. I would like to have this meeting on the 23rd of April, 1994 at 2:00PM at the clubhouse in O'Sullivan Sportsman Resort.

Please note that the address and phone number at the bottom of the water bill has changed. The street address is 6897 SR. 262 SE Othello, WA 99344. Our telephone numbers are as follows the water company phone number is 346-2464 (please leave a message,) my home phone is 346-2487, my pager number is 766-6168, the phone number for the park where you can reach Fred Barker is 346-2447. If you have any questions regarding this or any other questions please feel free to call or write.

Thank You,

Jerald H Lease
System Manager
Certified Water Operator
