### **Community Solar Company Registration is Open!**

On October 2, 2018, the Washington Utilities and Transportation Commission (commission) adopted new rules in WAC 480-103 for Community Solar Companies in [Docket UE-171033](#). The rules become effective on November 2, 2018.

Community Solar Companies must submit a registration application, pay registration fees, and receive approval prior to operating as a community solar company. Registration applications and additional information is available on the commission's website at [utc.wa.gov/communitysolar](http://utc.wa.gov/communitysolar). The Commission will accept registration applications but will not take final action on any application until the rules become effective.

If a Community Solar Company fails to register by the effective date of the rule, November 2, 2018, and operates, the commission may take enforcement action. Refer to the attached WAC 480-103 for community solar company rules.

If you have questions about the new rules or registration process please contact Licensing Services at (360) 664-1222 or email [transportation@utc.wa.gov](mailto:transportation@utc.wa.gov).
