RE: Docket UE-231031 Puget Sound Energy's Electric Tariff Revision

2-8-23

Dear Mr. Killip,

I am greatly concerned that a reduction of the compensation rate for new net meter solar systems will adversely effect the implementation of solar power for residential use and thereby contribute to the production and accumulation of harmful greenhouse gases. I support PSE's verbal commitment to maintaining the current rate. I am supporting PSE's request to the WUTC for approval to maintain the current solar compensation rate until December 31, 2025.

Sincerely,

Marcus Lang
