Subject: [External]DEQ 401 WQC for Former Portland Gas Manufacturing (PGM) Long-Term Monitoring and Contingency Action Project 2009-20-6

You don't often get email from jennifer.wagner@deq.oregon.gov. [Learn why this is important](#)

CAUTION: This email originated outside NW Natural. Please DO NOT CLICK LINKS OR OPEN ATTACHMENTS unless you recognize the sender and know the content is safe.

Good morning,

The Oregon Department of Environmental Quality has issued the 401 Water Quality Certification for Former Portland Gas Manufacturing (PGM) Long-Term Monitoring and Contingency Action Project 2009-20-6.

Please see the attached 401 Water Quality Certification (WQC) for your project, as well as a turbidity monitoring template. Read through the document thoroughly to ensure compliance with the certification language and any general or special conditions applicable to your project, including turbidity monitoring for any in-water work. A hardcopy will follow in the mail and a digital copy is available to the applicant through *Your DEQ Online*. To access via *Your DEQ Online* please log in, scroll down to *My Active Permits*, and click on the red PDF icon next to the project name to download.

Please remember the following:

- A copy of the 401 WQC must be kept at the project site at all times for review by all responsible parties and inspectors.
- Work must be done within the scope specified in the 401 WQC.
- The 401 WQC has unique and site-specific conditions and requirements.
- It is recommended that a turbidity monitoring plan be developed *before* initiating in-water work.
- If at any time you require clarification of the 401 WQC conditions, DEQ will provide technical assistance to ensure compliance.
- You must notify DEQ of a change of applicant and/or transfer of ownership of the project within 30 days.

If you have any questions, contact the following project manager:

Delia Negru
503-593-2493
Delia.Negru@deq.oregon.gov

Sincerely,

Jennifer Wagner (she/her)
