PUGET SOUND ENERGY SCHEDULE NO. 57 (Continued) Distribution System Transportation Service (Firm and Interruptible)

- 4. Constraint period provision: If the delivery of the Customer's gas supply is delayed because of a Company-imposed constraint (curtailment or entitlement) of service, the period for balancing the volume delivered to the Customer with the Customer's confirmed nomination will be extended by the number of days service was constrained.
- 5. Balancing upon termination: If there exists an overrun upon termination of service or upon transfer to another schedule in this tariff, the following charges apply: Overrun < 5% if not cleared by Customer in subsequent billing period at a charge equal to the cost of gas as shown on Schedule No. 101 (including taxes) for the schedule they moved to or are eligible for; Overrun or underrun of 5-10% or of > 10% the provisions of 2. or 3. above, respectively, apply. If an underrun of < 5% exists the Customer should either be provided the gas at no charge or paid for the gas on the same basis as charging for a similar amount of overrun.</p>

Section 13: Balancing Services--Aggregation

A Customer with meters at multiple sites may aggregate such meters for the purpose of determining the calculation of any balancing service charges. Aggregated meters must be served by a single city gate as determined by the Company, at its sole discretion, and will be specified in the Customer's service agreement.

Section 14: Balancing Services--Constraint Periods

- 1. Constraint periods, to be declared at the sole judgment and discretion of the Company, may occur as described in Rule 23 of this tariff.
- 2. Each constraint period will be specified as either a distribution system curtailment, an overrun entitlement, or an underrun entitlement. Only one type of constraint period may exist at any one time.
 - a. Distribution system curtailment: Allowable daily delivered volumes are limited to the lesser of the contracted daily firm demand or the confirmed nomination. Volumes consumed in excess of the allowed volumes will be billed at the unauthorized use of gas rate described in Section 8 of this schedule.
 - b. Overrun entitlement: Allowable daily delivered volumes are limited to less than or equal to 103% of the confirmed nomination. Volumes delivered in excess of 103% of the confirmed nomination will be billed at the unauthorized use of gas rate described in Section 8 of this schedule.
 - c. Underrun entitlement: Allowable daily delivered volumes must be greater than or equal to ninety-five percent of confirmed nominations, constituting a five percent tolerance level. Title to quantities in excess of the five percent tolerance will automatically transfer to the Company at no cost.
