WUTC Data Request 11

WUTC Data Request 11

REQUESTED BY: Jeremy Twitchell

Subject: Bridger Selective Catalytic Reduction

Referring to lines 14-21 on page 20 of Exhibit No. __ (RTL-1C), when the company considered the impact of the 2013 official forward price curve for natural gas on its analysis of SCR at Bridger, were the increased costs for Bridger's coal supply that were identified in the Bridger Coal Company's 2013 Mine Plan also considered? If so, please provide documentation of how the increased coal costs were included and their impact on the analysis.

Response to WUTC Data Request 11

The coal costs listed in Confidential Exhibit No. RTL-3C incorporated the cost increases reported in Bridger Coal Company's (BCC) 2013 Mine Plan. There were no significant increases between then and the time of the September 2013 official forward price curve (OFPC).
