Re: Docket No. UE-011595, Monthly Power Cost Deferral Report, November 2023
Docket No. UE-140188, Monthly REC Report, November 2023

Dear Ms. Hunter:

Enclosed for electronic filing is Avista Corporation's Power Cost Deferral Report for the month of November 2023. The report includes the monthly Energy Recovery Mechanism (ERM) accounting journal together with supporting work papers (Attachment A). The native format of the Excel worksheets for the deferral calculation and the journal in "pdf" format are attached to the electronic filing. Please note "pdf" is the native form for the deferral journal. In summary, the following cumulative balances ending November 30, 2023 (excluding interest) related to the ERM are as follows:

	<u>Total</u>	<u>Absorbed (Avista)</u>	<u>Deferred (Customer)</u>
First \$4M at 100%	\$ 4,000,000	\$ 4,000,000	\$ -
\$4M to \$10M at 25% (rebate)	\$ -	\$ -	\$ -
\$4M to \$10M at 50% (surcharge)	\$ 6,000,000	\$ 3,000,000	\$ 3,000,000
Over \$10M at 10%	\$ 10,142,167	\$ 1,014,217	\$ 9,127,950
	\$ 20,142,167	\$ 8,014,217	\$ 12,127,950

As summarized on page 7 (line 26) of the Power Cost Deferral report, actual net power supply costs, including the retail revenue adjustment, for November were higher than authorized net power costs for Washington by \$1,788,394 resulting in an accounting entry in the surcharge direction in the amount of \$1,609,554. As illustrated in the table above, year to date actual expenses

exceed authorized by \$20,142,167. The Company absorbed \$8,014,217 and \$12,127,950 was deferred in the surcharge direction for customers.

Overall loads were slightly higher for the month of November and Avista continues to see a decreased hydro position which resulted in a higher utilization of thermal resources. Short term energy prices were lower than in the prior month but remained higher than authorized which provided Avista with the opportunity to offset expenses by selling excess energy into the market. The result for the month was an increase to the ERM's surcharge position.

In addition, tracking and recording of the Solar Select program is consolidated into account 186295 (see page 6). The Company consolidated the impacts of the program into one general ledger account to provide additional transparency for annual ERM reporting. For ease of reference and budget purposes the Company is crediting the monthly net benefit/costs for this program monthly (rather than annually). The Solar Select program was in the rebate direction for the month in the amount of \$31,827.

The report also includes the monthly renewable energy credits (RECs) accounting journal together with backup work papers (Attachment B). Per Order 05, Docket UE-140188, the Company defers 100% of the net monthly RECs not associated with compliance for the Washington Energy Independence Act. The total recorded deferral for the month (excluding interest) was \$346,634.

Interest for the ERM is calculated pursuant to the Settlement Stipulation approved by the Commission's Fifth Supplemental Order in Docket No. UE-011595, dated December 18, 2002. Interest is applied to the average of the beginning and ending month deferral balances net of associated deferred federal income tax. The Company's actual cost of debt is used as the interest rate. The interest rate is updated semi-annually, and interest is compounded semi-annually.

If you have any questions, please contact Ryan Finesilver at (509) 495-4873.

Sincerely,

/s/Patrick D. Ehrbar
