

**BEFORE THE WASHINGTON STATE
UTILITIES AND TRANSPORTATION COMMISSION**

In the Matter of the Request of)	DOCKET UT-061754
)	
QWEST CORPORATION,)	ORDER 01
)	
For Assignment of Telephone Number)	ORDER ASSIGNING NUMBERING
Resources)	RESOURCES
.....)	

BACKGROUND

- 1 Qwest Communications (Qwest or Company) requested on November 17, 2006, that the Washington Utilities and Transportation Commission (Commission) overturn the numbering administrator's decision to withhold numbering resources and direct the Federal Communications Commission (FCC) Pooling Administrator to provide a ten thousand number code in the 206 area code, Seattle rate center. Qwest's inventory of telephone numbers for assignment in the rate center does not satisfy the requirement for specific numbers for their customer, Children's Hospital and Regional Medical Center. Children's Hospital requires numbers for expansion and use in their dialing plan which covers a main campus and multiple campus locations based on an internal hospital private branch exchange dialing plan. Qwest submitted a request to the Pooling Administrator (PA) for additional numbering resources in the rate center, however, the request was denied as the serving central office does not meet the utilization level established by the FCC.

- 2 The Pooling Administrator will only accept an exception request with a waiver from the Commission. The Commission investigated the Company's request in order to address number conservation measures in the area code and found no reason to disapprove it. Qwest will adhere to the requirement to review numbering resources and the Company will comply with the requirements of the FCC's North American Number Plan Administrator (NANPA) and PA regarding the return of unused numbers. Qwest provided the Commission with the customer's request, responded to extensive Commission information requests, and provided detailed inventory for number resources and proof of utilization in the rate center.

FINDINGS AND CONCLUSIONS

- 3 (1) On December 28, 2001, the FCC issued an order establishing a “safety valve” allowing carriers that do not meet the utilization threshold in a given rate center to obtain additional numbering resources apart from the general waiver process.¹ Specifically, the FCC granted to state commissions the authority to direct the Pooling Administrator (Neustar) to release numbers to a carrier to satisfy a specific customer request that can not be met with the carrier’s current inventory.²
- 4 (2) The Commission has jurisdiction over this matter pursuant to RCW 80.36.610, which gives the Commission authority to take actions necessary to implement the Federal Telecommunications Act of 1996.
- 5 (3) Normally, additional numbering resources are granted only when existing resources are forecasted to exhaust within six months.
- 6 (4) The 206 area code is projected to exhaust in the first quarter of 2024.

ORDER

THE COMMISSION ORDERS:

- 7 (1) Neustar, Inc., acting as the Pooling Administrator, may release one ten-thousand number code in the Seattle rate center, area code 206, to Qwest Communications.
- 8 (2) The Commission retains jurisdiction over this matter to take such future actions as may be appropriate.
