Dear Sir &/or Madam:

I've received notice from H & R. Waterworks of a pending rate increase.

May I ask you do not give the raise he is asking for. He should be trying to cut back on his expenses as we have to. Instead of using 2 trucks to drive the route to teach someone new use 1. Better still get smaller vehicles to save on gas.

Also, why can't he give a special rate to low income families as other Co's. do. I stay below 600 cuft all winter but use more in summer. I appreciate the fact he will lower the water use fee for people like me who use less but in summer we should not be penalized for having a bit of living plants around - after all it is helping the environment!

I'm sure you've already made up your minds as to the raise being given but I'm objecting anyway!

Sincerely
Kathleen Nelson
