

**BEFORE THE WASHINGTON STATE  
UTILITIES AND TRANSPORTATION COMMISSION**

In the Matter of the Request of	)	DOCKET UT-081005
	)	
QWEST CORPORATION,	)	ORDER 01
	)	
For Assignment of Telephone	)	ORDER ASSIGNING NUMBERING
Numbering Resources	)	RESOURCES
.....	)	

**BACKGROUND**

- 1 Qwest Corporation, (Qwest or Company) requested on June 4, 2008, that the Washington Utilities and Transportation Commission (Commission) overturn the North American Numbering Plan Administrator’s (NANPA or Numbering Administrator) decision to withhold numbering resources and direct the Number Pooling Administrator (Neustar, Inc.) to open a new code in the Bremerton Rate Center. Qwest requires sequential telephone numbers in a specified single prefix unavailable in the 360 NPA, Bremerton Rate Center. Currently there are 22 available blocks in the number pool inventory in the Bremerton Rate Center. The Bremerton area is growing rapidly and the Qwest customer is a medical facility currently extended over multiple prefixes.
  
- 2 The medical facility is in the midst of campus growth and expansion. Plan implementation requires unity in the dialing plan for serving district customers and staff. A cohesive dialing arrangement will promote community development, public safety and reliable access to medical services.
  
- 3 The Pooling Administrator will designate Qwest as the code holder and assign the new code to Qwest. A quantity of the existing numbering resources will be returned to the administrator for replenishing the number pool inventory in the Bremerton Rate Center. The 360 NPA is forecasted to exhaust in the fourth quarter 2011. Qwest provided the Commission with detailed inventory for number resources and proof of utilization in the rate center. Qwest will adhere to the requirement to review numbering resources and comply with the requirements of the FCC’s North American Number Plan Administrator and the Pooling Administrator regarding the return of unused numbers.
  
- 4 Telephone companies or carriers commonly hold and manage a reasonable inventory of telephone numbers in the areas where they provide service. When more are needed carriers request them from the Numbering Administrator.

5 The Federal Communications Commission (FCC) issued an order establishing a “safety valve” allowing carriers that do not meet the utilization threshold in a given rate center to obtain additional numbering resources apart from the general waiver process.<sup>1</sup> Specifically, the FCC granted to state Commissions the authority to direct the Number Pooling Administrator to release numbers to a carrier to satisfy a specific customer request that cannot be met with the carrier’s current inventory.<sup>2</sup>

### FINDINGS AND CONCLUSIONS

- 6 (1) The Washington Utilities and Transportation Commission is an agency of the State of Washington vested by statute with the authority to regulate the rates, rules, regulations, practices, accounts, securities, transfers of property and affiliated interests of public service companies, including telecommunications companies. *RCW 80.01.040, RCW 80.04, RCW 80.08, RCW 80.12, RCW 80.16 and RCW 80.36.*
- 7 (2) Qwest Corporation is a telecommunications company and a public service company subject to Commission jurisdiction.
- 8 (3) The Telecommunications Act of 1996 (the Act) allows the FCC to establish rules to implement the Act and delegate authority to state Commissions.
- 9 (4) The FCC has created a “safety valve” mechanism within the framework of number resource management and delegated to the Commission authority to grant requests by carriers that receive a specific customer request for numbering resources that exceeds their available inventory. The FCC has also given states some flexibility to direct the Number Pooling Administrator to assign additional numbering resources to carriers that have demonstrated a verifiable need for additional numbering resources.<sup>3</sup>
- 10 (5) The Commission has jurisdiction over this matter pursuant to RCW 80.36.610, which authorizes the Commission to take actions necessary to implement the Act.

---

1 *In the Matter of Numbering Resource Optimization*, Third Report and Order and Second Order on Reconsideration, CC Docket 99-200, FCC No. 01-362, ¶¶ 57-66 (Rel. December 28, 2001).

2 *Id.* ¶ 64.

3 *Id.*, ¶ 61.

- 11 (6) Normally, additional numbering resources are granted only when existing resources are forecasted to exhaust within six months.<sup>4</sup>
- 12 (7) The Number Pooling Administrator's Web site reports an inventory of 66 prefixes in the 360 NPA, and indicates that the exhaust of NPA 360 is scheduled for the fourth quarter of 2011.
- 13 (8) This matter came before the Commission at its regularly scheduled meeting on June 26, 2008.
- 14 (9) The allocation of the requested number resources will promote community development, public safety and reliable access to medical services in the Bremerton area. The Commission, therefore, finds the petition consistent with the public interest.

**ORDER**

**THE COMMISSION ORDERS:**

- 15 (1) Neustar, Inc., acting as the Number Pooling Administrator, to open a new code, in the Bremerton rate center and release one code to Qwest Corporation.
- 16 (2) The Commission retains jurisdiction over this matter to take such future actions as may be appropriate.

The Commissioners, having determined this Order to be consistent with the public interest, directed the Executive Director and Secretary to enter this Order.
