1. **Date of request**

   4119112

2. **Location of service and reason for the specific request.**
   Location: ███████████████████████████ We need more phone numbers because our company is rapidly expanding and we are running out of our existing DIDs.

2. **Quantity of TNs required and (if applicable) any existing TNs that will be returned.**
   We need 1,000 DID. We have none to return.

3. **Date want TNs available for service and the date TNs will actually be used.**
   We need them In the next 30 days and will begin using them as soon as we have them.

4. **Specific TN range requirements, and why those ranges are needed.**
   ███████████████████████████████ would be first choice. **If we can** get these delivered over existing circuits we could probably live with a different area code. NXX can start with any two digits but we want the third digit to be a 5. This plan will accommodate the existing internal company dialing plan.

5. **Specific NXX requirements/restrictions, and the reason for the specific request.**
   See **response to question 5 above.**
