Subject: RE: Toteff Road Petition

Kathy,

See corrections below in Red.

The current mainline train counts are 45 freight at 60 mph and 10 passenger at 79 mph. There will be 2 additional round trip Amtrak's a day once the project is completed so please add an additional 4 trains in the future.

The spur tracks (Temco) tracks are barely used (1-2 a month) per County/Temco their speed is 2-10mph.

In the future configuration there will be an additional 3rd mainline and drill track adjacent to the 2 existing main tracks. The drill track speed will be restricted speed, less than 25 mph.

Thanks,
Lane
