**Subject:** Call for Comments

All,

Thank you for participating in the natural gas COS Generic 2018 meeting. As we discussed, Staff's perspective is that a rulemaking would be the most appropriate forum to continue a generic cost-of-service discussion. We see several key topic areas that need clear and consistent treatment, as

provided by rule. We understand that certain areas may be addressed through a policy statement or whitepaper.

Staff has identified several topics for discussion. Based on the discussions we had with the participants, a chance to discuss the scope of the issues to be considered is important. Staff is eager understand all stakeholder's positions and opinions regarding these or other topics that should be included in this docket.

Please see the attached for potential topic areas to discuss.

We would like to receive comments concerning staff's topic areas and rulemaking proposal from all stakeholders by May 30, 2018. Please provide your written comments through the records center referencing Docket UG-170003. We understand some overlap may exist between certain topic areas for participants in both proceedings. We will do our best to consolidate issues that have natural gas and electric impacts and provide cross-references where needed.

Thank you,

Jason Ball  
Washington Utilities and Transportation Commission
