I also believe you are mistaken me for Behmle and sons on "Violation" I take digging in the Rightway very serious, and have been doing this for over 30 years, if gas line was installed correctly I would not have hit, it didn't matter how many locate were done, it was cheap work, we hand dig 12" at a time with, the gas was installed at more than 45° angle in Rightway with put 18" at deep end and 4" deep at other end in 12 inch wide ditch, Rightway inspector said it was illegal, installed in there Rightway in Road, in fact it was removed, and lowered, and put in conduit, with; Help them with. Fact installed Right I can find 10 out 10 contractor would have hit it too, have many pictures, to show how it was installed wrong.

Thanks

John Behmle

PS. The install sewer main for Sues creek water, sewer in middle of street, in Kent, crossed many utility and many, that weren't mark at all to never hit one, because of careful digging, with allow have for over 30 years.
