

**THE FILES IN THIS FOLDER ARE
DESIGNATED IN THEIR ENTIRETY AS
CONFIDENTIAL PER WAC 480-07-160**

The files in this folder are AURORA model files and are designated in their entirety as Confidential per WAC 480-07-160 because they contain Confidential information relating to PSE's existing resource portfolio, including system conditions, generating assets, costs, resource market analysis, and operating parameters.

AURORA model output files are unreadable except with AURORA software. The files, including file names, cannot in any way be modified or altered without compromising the functionality of the model. Therefore, marking, shading, or otherwise designating Confidential information to comply with WAC 480-07-160(5) is not possible nor is it possible to redact Confidential information. It would also be impractical and unduly burdensome to do so given there are thousands of cells that would require marking or redacting.

Notwithstanding those limitations, in accordance with WAC 480-07-160(8), the AURORA model output files should be given the same level of protection as if the files had been marked, shaded, or otherwise designated Confidential pursuant to WAC 480-07-160.
