Subject: respectful objection!
Date: Monday, October 17, 2016 9:40:08 AM

On the bridge line. I am direct safety and risk management for one of the largest local employers, but approach this issue as an individual.

Note: Unknown possibly significant financial liability allocations and safety are one in the same. You just excluded safety in the opening. You just abdicated your responsibility to ratepayers.

Note: Additionally, TOTE has cancelled their current LNG conversion effort. Did you know this? PSE has ZERO customers!

Note: Citizens are being asked to comment on an opaque methodology, which is patently unfair.

Respectfully,

Phil Brooke
Summit-Waller, WA
