SCHEDULE 24  
SMALL GENERAL SERVICE

AVAILABLE:

In all territory served by Company in the State of Washington.

APPLICABLE:

To non-residential Customers whose entire requirements are supplied hereunder with electric service loads which have not exceeded 100 kW more than once in the preceding 12-month period, or with seven months or less of service, whose loads have not registered more than 100 kW. And to seasonal Customers, as defined in Rule 1 of this tariff, with electric service loads which have not exceeded 200 kW more than once in the preceding 12-month period, or with seven months or less of service, whose loads have not registered more than 200 kW. In the case that the motor nameplate horsepower rating is used to determine the seasonal Customer's annual load size, that load size will also be used to determine eligibility for this schedule.

The Company will not switch a Customer between General Service Schedules 24 and 36 more than once in a 12-month period, unless the following exception is met: In the event that a Customer's load increases due to changes in operations, the Company may, at its discretion, place the Customer on a schedule with a higher demand requirement, if so warranted.

Deliveries at more than one point, or more than one voltage and phase classification, will be separately metered and billed.

Emergency, Seasonal, and Remote Service will be furnished by contract in accordance with Rule 2 of this Tariff.

This Schedule is not applicable to standby service.

MONTHLY BILLING:

The Monthly Billing shall be the sum of the Basic, Demand, Energy, and Reactive Power Charges. All Monthly Billings shall be adjusted in accordance with Schedules 91, 97, 98, and 191.

LARGE GENERAL SERVICE  
LESS THAN 1,000 KW

Energy Charge:

Base	
Rate	
4.350¢	per kWh for the first 40,000 kWh
3.989¢	per kWh for all additional kWh

MINIMUM CHARGE:

The monthly minimum charge shall be the Basic Charge plus the Demand Charge. A higher minimum may be required under contract to cover special conditions.

REACTIVE POWER CHARGE:

The maximum 15-minute reactive demand for the month in kilovolt amperes in excess of 40% of the kilowatt demand for the same month will be billed, in addition to the above charges, at 45¢ per kvar of such excess reactive demand.

PRIMARY VOLTAGE METERING AND DELIVERY ADJUSTMENTS:

The above monthly charges are applicable without adjustment for voltage when delivery and metering are at Company's standard secondary voltage.

Metering: For so long as metering voltage is at Company's available primary distribution voltage of 11 kV or greater, the above charges will be reduced by 1.0%.

Delivery: For so long as delivery voltage is at Company's available primary distribution voltage of 11 kV or greater, the total of the above charges will be reduced by 30¢ per kW of load size used for the determination of the Basic Charge billed in the month. A High Voltage Charge of \$60 per month will be added where such deliveries are metered at the delivery voltage.

The reductions of charges herein shall not operate to reduce the minimum charge.

When a new delivery or an increase in capacity for an existing delivery is, at request of Customer, made by means of Company-owned transformers at a voltage other than a locally standard distribution voltage, the above charges for any month will be increased by 30¢ per kW of load size used for the determination of the Basic Charge billed in the month.

Company retains the right to change its line voltage or classifications thereof at any time, and after reasonable advance notice to any Customer affected by such change, such Customer then has the option to take service at the new line voltage or to accept service through transformers to be supplied by Company subject to the voltage adjustments above.

SPECIAL PROVISIONS:

Company will replace individually burned out or broken lamps as soon as practicable after notification by the Customer.

Street lighting service under other conditions and for street lights of sizes and types not specified herein will be supplied under special contract.

Company may require Customer participation in the cost of installing circuit to render street lighting service when the length of such circuit from a source of suitable voltage on Company's system to the point of connection with the proposed street light or street lighting system is in excess of 300 feet.

Company may not be required to furnish service hereunder to other than municipal Customers.

The Customer may request temporary suspension of power for lighting by written notice. During such periods, the monthly rate will be reduced by Company's estimated average monthly relamping and energy costs for the luminaire. Company will not be required to reestablish such service under this rate schedule if service has been requested to be permanently discontinued by the Customers.

SCHEDULE 99  
POWER COST ADJUSTMENT MECHANISM

AVAILABLE

In all territory served by the Company in the state of Washington.

APPLICABLE

This Schedule shall be applicable to all retail tariff Customers taking service under the terms contained in this Tariff.

CONDITIONS:

A. Sharing Bands

The Power Cost Adjustment Mechanism (PCAM) is an incentive-based mechanism that shares variations in adjusted actual net power costs from the baseline forecast net power costs in rates, with one exception. The one exception is that 100 percent of cost increases or decreases related to Qualifying Facility contracts are exempted from the sharing bands because the purchases are required by PURPA. All other costs are subject to symmetrical sharing bands, which straddle "baseline net power costs" in rates. The increment is allocated 90 percent to customers and 10 percent to the Company. The deferrals are allocated to Washington pursuant to the Revised Protocol.

"Baseline net power costs" are the net power costs in effect during the measurement period. Measurement periods will be tied to the balancing account trigger.

"Actual adjusted net power costs" are equal to actual net power costs, adjusted to remove prior-period adjustments recorded during the deferral period and to include Commission-adopted adjustments from the most recent rate case. For example, actual results are adjusted to reflect the Commission-adopted SMUD wholesale sale revenue imputation adjustment. Conversely, hydro normalization and forced outage rate adjustments are excluded.

B. Accruals

Washington net power cost accruals will be determined on a monthly basis and posted to an accrual account. An entry into the accrual account will occur in every month, unless the actual adjusted net power cost is identical to the level in rates. A positive balance represents money owed to the Company by its customers. A negative balance indicates money the Company owes to its customers. The balance will accrue interest at the Company's authorized rate of return.

A deferred balance of plus or minus \$5 million is a trigger. Once the trigger is reached, the Company is required to return the balance to, or request recovery from, customers. The amortization period is over a one-year period.

C. Costs Included

The PCAM is designed to include all net power cost components. It reflects the impact of cost changes for fuel, wheeling and purchase power expenses and wholesale electricity and gas sales.

D. Rate Spread and Rate Design

Sur-charges and sur-credits are spread to customers on a uniform cents-per-kwh basis to all

 customer classes in order to reflect changes in costs per MWh incurred by the Company to serve customers. Because differences in delivery voltage result in different line losses and power requirements, the sur-charge and/or sur-credit varies by delivery voltage.

E. Earnings Test  
 If the Company's actual rate of return reflected in its most recent semi-annual report was above authorized levels, costs accrued during that period would not be recoverable. Conversely, if earned rates of return were below authorized levels, accrued balances owed to customers would not be returned.

**MONTHLY BILLING:**

All charges and provisions of the applicable rate schedule will be applied in determining a Customers' bill except that the rates reflected in the Customer's bill shall be adjusted by an amount equal to the product of all kilowatt-hours of use multiplied by the following cents per kilowatt-hour:

	Delivery Voltage	
	Secondary	Primary
Schedule 15	0.0 cents	
Schedule 16	0.0 cents	
Schedule 17	0.0 cents	
Schedule 18	0.0 cents
