Staff Questions to Stakeholders:

1. If the Commission changes the rule to include a demarcation point, what is the impact on service quality for E911 customers (reference King County comments, 2/2005 question 2.c.)
2. What is the potential impact (positive/negative) of allowing contracts between PSAPS and CLECs rather than pricelist filings?

3. Would the parties consider sponsoring legislation to increase funding to allow PSAPs to purchase adequate transport if WAC 480-120-450 is revised to include a demarcation point?
4. Are the proposed changes to the rule technology neutral? What language changes are needed to accommodate enhanced 911 over VoIP based services?

12:00-1:00
