Subject: Docket # U-180525 - Citizen major concern regarding health effects due to Smart Meters
Date: Tuesday, January 29, 2019 10:46:03 AM

Jan. 29th, 2019

I am EXTREMELY concerned with the anticipated actions of PSE in regard to an anticipated common practice of wide distribution of Smart Meters.

There is multitudes of data showing the catastrophic effects of EMF's to a person's health and daily well being. My dear friend, working with a router above his head, has just discovered a massive brain tumor with no hope of altering its destructive course. His life expectancy has just been shortened to less than a year. Another friend, living under a cell tower, has recently undergone brain surgery to remove his tumor. A third, has just died from the same thing. These are/were all healthy people, friends of mine .. and there are others .. just HERE in our small S. Whidbey community. The number of these cancers in our region are unprecedented.

You must have children or family you love. Do YOU REALLY want them exposed to these extremely life threatening invasive frequencies? Read about it yourself. Don't listen to me. The data is everywhere. There is a wealth of information on Whidbey's C.L.E.A.R. website: <http://www.clearwhidbey.org/>

I cannot imagine if you 'investigate', that you yourself would want one of them at your own home.

--

Thanks for listening,
