I am writing about energy. My name is Alesia Chaney and I went to **Cascade Natural Gas**, in the year of 1998 because I had a house that was from (1950) when I purchased it and need to be updated. The thought was to go energy efficient as possible, however...just my luck, very shortly afterward, I received an increase.

The Gas bill has also changed in its billing with *basic service and Now a delivery charge, energy assistance fund, pipeline replacement, follow by and conservation thermos fees*. Some times I over pay because of the shock and receive a conservation fee of thermos. (credit) Are you truly aware of all the addition to my billing?

I work all the time so when I think about retirement and, I need a straight forward gas total bill . This current bill from Cascade doesn't really add up. It is very strange,!....Very strange billing! An Example is my October billing, with no heating at this time and only 6 thermos x .49569 = \$ 2.97 total with the feeof the feeof the addition fee..... plus the pipeline replacement for Cascade or commonly called= **Canadian** National Gas, my real bill is \$9.43. = difference of \$ 6.46. , 2/3 of this current bill is fees? What they sell everyone on is that it is only....a small increase. In simple English, how can you do this? The fee, with Fee With Fee, With additional Fee and replacement fees, how strange it feels to me to take from the public! Why not simply say we have a total billing of= all your money . With any kind of luck you canretire at97 years.... of age.

Why worrier with the understanding from WUTC and Olympia, they are always looking out for theworking person who really appreciate your hard work, happy retirement anyway!

Sincerely

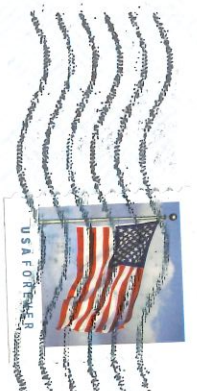

Alesia D Chaney

PS; I have Natural Gas to heat my home this winter! Oh "Great!
