Dear Cascadia National Gas,

Jan years ago National gas was very reasonable compared to electricity.

Before the proposed increase in August we can only afford to burn the pilot light in my bedroom - \$15.00/month. Not used to cost about 7.00.

The increase is not tolerable for people who are retired on a limited income. There should be special rates for those citizens in this category. Please make a special rate for retired citizens -

P.S. I live in a first level house with nothing & need a rate book please.

Thank you -

Act 668-991-0000-3

I'm against the rate increase -
