**SCHEDULE**

**67**

**LINE EXTENSION SCHEDULE**

1. This schedule applies to the extension of single-phase service to residential, commercial lighting and incidental power Customers not exceeding 25 KW per Customer.
2. It will be the policy of the Company to extend its lines to these Customers on a basis which considers the ratio of the Company's investment in facilities to average annual Customer revenue, commonly referred to as "investment ratio".
3. The Company recognizes that the investment ratio varies according to the rate schedule under which Customers qualify for service.
4. The Company will construct line extensions financed entirely by the Company which will result in an investment ratio not exceeding 12 to 1.
5. Any Customer requiring a greater extension than that provided for above shall pay in cash the estimated cost of such additional construction. In lieu of such cash payment the Customer may, at the option of the Company, guarantee to the Company a minimum monthly revenue which the Company shall deem to be compensatory.
6. The Company shall not be required to construct any line extension irrespective of distance which, because of extraordinary construction costs or other circumstances, has an investment ratio which makes it economically unfeasible. Any extension which exceeds 2600 feet per Customer will not be considered to fall within the scope of this schedule and will be subject to separate arrangements with the Customer.
7. The Company will not serve any additional Customers from a line extension, constructed under this schedule or previous schedules, within the term of the line extension contract unless arrangements are made which the Company deems equitable as to the original and additional Customers.
8. All service furnished under this schedule will be subject to the terms of a contract extending for a period of not less than five years.

Issued October 8, 1965

Effective November 8, 1965
