Subject: RE: Protective Order

Bob,

It is my understanding that Commission Staff are bound by RCW 42.52.050 regarding disclosure of confidential information without the necessity of signing a confidentiality agreement. Accordingly, I am fine with Staff reviewing the documentation in the referenced case without a signed confidentiality agreement.

Tom

Tom- the attached protective order involves a case from 1997. Commission staff that were not involved in the case at that time are now interested in reviewing some documentation that was marked confidential. The staff members are in the pipeline safety section.

Does PSE have any objection to staff reviewing the documents? The alternative is to have them sign a confidentiality agreement, but that seems too formal at this stage. Or PSE could review its file and see if the material remains confidential, but that seems too time-consuming.

Let me know. Thanks
