August 18, 2014  
Boise Data Request 4.4

**Boise Data Request 4.4**

Please provide an accounting detail for each individual power transaction that PacifiCorp has been required to make as a direct result of the Colstrip Unit 4 outage. Please also demonstrate that each transaction would not have been executed but for the Colstrip Unit 4 outage.

**Response to Boise Data Request 4.4**

The Company objects to this request as requiring information not maintained in the ordinary course of business or development of a special study. Without waiving this objection, the Company responds as follows:

The Company transacts on a portfolio basis and does not assign individual power transactions to specific purposes and therefore cannot identify specific power transactions that occurred or failed to occur as a result of the Colstrip Unit 4 outage.
