	Lottie Voller	Web	I am calling to ask if the Clean Energy Implementation Plan, will raise customer costs. The hearing is October 10, 2024 at 6 pm. If it effects our rates, I am not in favor of that. Costs are already so high at the grocery store and gas pump, basically anything we all buy has skyrocketed in price. Please don't pass this cost onto the customers.
	Aaron Nonnenmacher	E-mail	<p>Stop the madness! It's so frustrating to see the price of things skyrocketing over the last several years. All due to the greed of corporations. There is no need to have the American public suffer to line the pockets of already rich men. Now Pacific power wants to raise their rates AGAIN over the next few years. Why? The government is essentially forcing people to use Electric vehicles. The power grid can't handle this vast consumption of energy. Especially since they want to remove dams and resist the use of nuclear energy which is the most efficient power source we have.</p> <p>It's even more frustrating that Pacific Power is our only choice. We have no alternate means of power. We the people are being held hostage by the power company.</p> <p>Let's start using common sense and build more nuclear energy plants and create more energy to drive the cost lower. People shouldn't be put in a position where they have to choose to pay the power bill or buy groceries.</p> <p>No more raising rates or give us the option to choose a different provider.</p>
