Dear Commission,

RE: 2010 Natural Gas Standard Inspection-Benny's Colville Inn

This is a follow up letter in regards to an inspection appointment for August 18, 2011. To date the work planned with Avista Utilities and a local gas line contractor to eliminate the master meter system has not been completed due to high volume of business flow and down time required to complete the project.

I would like to plan this interruption to business at a slower business volume time (early to late October) if permitted by the Commission. In such request I would feel comfortable asking for an extended time frame for completing work by November 30, 2011.

Thank you for your cooperation in this matter.

Sincerely,

Andrew Hydorn
